Islamic philosophy emerged from its theological background when Muslim thinkers began to study this foreign tradition, became competent students of the ancient philosophers and scientists, criticized and developed their doctrines, clarified their relevance for the questions raised by the theologians, and showed what light they threw on the fundamental issues of revelation, prophecy, and the divine law.

~~Islam - Islamic philosophy | Britannica~~

Islamic philosophy is the result of a person ' s thinking about God, Prophethood, humanity, nature, the reality of ontology, views on the nature of space, time, and matter. In addition it also developed in the science of kalam, ul fiqh, and Sufism based on Islamic teachings as a form of logical and systematic flow of thought.

The first comprehensive survey of Islamic philosophy from the seventh century to the present, this classic discusses Islamic thought and its effect on the cultural aspects of Muslim life. Fakhry shows how Islamic philosophy has followed from the earliest times a distinctive line of development, which gives it the unity and continuity that are the marks of the great intellectual movements of history.

~~A History of Islamic Philosophy | Columbia University Press~~

The history of Islam concerns the political, social, economic and cultural developments of Islamic civilization.Most historians accept that Islam originated in Mecca and Medina at the start of the 7th century CE. Muslims regard Islam as a return to the original faith of the prophets, such as Jesus, Solomon, David, Moses, Abraham, Noah and Adam, with the submission (islam) to the will of God.

A comprehensive reference work covering all figures of the earliest period of philosophy in the Islamic world. Both major and minor thinkers are covered, with details of biography and doctrine as well as detailed lists and summaries of each author s works."

First published in 1993. Routledge is an imprint of Taylor & Francis, an informa company.

Very occasionally a book appears which provides a perfect bridge between amateurs and professionals. This event is usually less likely to happen in the somewhat arcane field of philosophy and almost beyond concept in the English speaking world when the subject is entwined with the history of Islam. The finer points of philosophical issues are also discussed and presented to enable anyone, whether a scholar or not, Arabic or Westerner, to understand the truths these ancients sought.

The Cambridge History of Philosophy in Late Antiquity comprises over forty specially commissioned essays by experts on the philosophy of the period 200 – 800 CE. Designed as a successor to The Cambridge History of Later Greek and Early Medieval Philosophy (edited by A. H. Armstrong), it takes into account some forty years of scholarship since the publication of that volume. The contributors examine philosophy as it entered literature, science and religion, and offer new and extensive assessments of philosophers who until recently have been mostly ignored. The volume also includes a complete digest of all philosophical works known to have been written during this period. It will be an invaluable resource for all those interested in this rich and still emerging field.

In the history of philosophy, few topics are so relevant to today's cultural and political landscape as philosophy in the Islamic world. Yet, this remains one of the lesser-known philosophical traditions. In this Very Short Introduction, Peter Adamson explores the history of philosophy among Muslims, Jews, and Christians living in Islamic lands, from its historical background to thinkers in the twentieth century. Introducing the main philosophical themes of the Islamic world, Adamson integrates ideas from the Islamic and Abrahamic faiths to consider the broad philosophical questions that continue to invite debate: What is the relationship between reason and religious belief? What is the possibility of proving God's existence? What is the nature of knowledge? Drawing on the most recent research in the field, this book challenges the assumption of the cultural decline of philosophy and science in the Islamic world by demonstrating its rich heritage and overlap with other faiths and philosophies.

The study of Islamic education has hitherto remained a tangential inquiry in the broader focus of Islamic Studies. In the wake of this neglect, a renaissance of sorts has occurred in recent years, reconfiguring the importance of Islam ' s attitudes to knowledge, learning and education as paramount in the study and appreciation of Islamic civilization. Philosophies of Islamic Education, stands in tandem to this call and takes a pioneering step in establishing the importance of its study for the educationalist, academic and student alike. Broken into four sections, it deals with theological, pedagogic, institutional and contemporary issues reflecting the diverse and often competing notions and practices of Islamic education. As a unique international collaboration bringing into conversation theologians, historians, philosophers, teachers and sociologists of education Philosophies of Islamic Education intends to provide fresh means for conversing with contemporary debates in ethics, secularization theory, child psychology, multiculturalism, interfaith dialogue and moral education. In doing so, it hopes to offer an important and timely contribution to educational studies as well as give new insight for academia in terms of conceiving learning and education.
