With the CBR250R you get a nicely presented package of which its silhouette mimics the new style Honda Fireblade. This rolling loveliness is powered by a water-cooled single-cylinder 250cc engine that is, at best, economical and reliable and, at worst, woefully boring. Think more along the lines of a big-bore 125cc to best describe the Honda engine.

Coding for Beginners in easy steps has an easy-to-follow style that will appeal to anyone, of any age, who wants to begin coding computer programs. You need have no previous knowledge of any computer programming language so it's ideal for the newcomer, including youngsters needing to learn programming basics for the school curriculum. Coding for Beginners in easy steps instructs you how to write code to create your own computer programs. It contains separate chapters demonstrating how to store information in data structures, how to control program flow using control structures, and how to create re-usable blocks of code in program functions. There are complete step-by-step example programs that demonstrate each aspect of coding, together with screenshots that illustrate the actual output when each program has been executed. Coding for Beginners in easy steps begins by explaining how to easily create a programming environment on your own computer, so you can quickly begin to create your own working programs by copying the book's examples. After demonstrating the essential building blocks of computer programming it describes how to code powerful algorithms and demonstrates how to code classes for Object Oriented Programming (OOP). The examples throughout this book feature the popular Python programming language but additionally the final chapter demonstrates a comparison example in the C, C++, and Java programming languages to give you a rounded view of computer coding. The code in the listed steps within the book is colour-coded to precisely match the default colour-coding of the Python IDLE editor, making it easier for beginners to grasp. By the end of this book you will have gained a sound understanding of coding and be able to write your own computer programs that can be run on any compatible computer.

This volume considers the dynamic relations between the contemporary practices of international criminal tribunals and the ways in which competing histories, politics and discourses are re-imagined and re-constructed in the former Yugoslavia and beyond. There are two innovative aspects of the book - one is the focus on narratives of justice and their production, another is in its comparative perspective. While legal scholars have tended to analyze transitional justice and the international war tribunals in terms of their success or failure in establishing the facts of war crimes, this volume goes beyond mere facts and investigates how the courts create a symbolic space within which competing narratives of crimes, perpetrators and victims are produced, circulated and contested. It analyzes how international criminal law and the courts gather, and in turn produce, knowledge about societies in war, their histories and identities, and their relations to the wider world. Moreover, the volume situates narratives of transitional justice in former Yugoslavia both within specific national spaces - such as Serbia, and Bosnia - and beyond the Yugoslav. In this way it also considers experiences from other countries and other times (post-World War II) to offer a sounding board for re-thinking the meanings of transitional justice and institutions within former Yugoslavia. Included in the volume's coverage is a look at the Rwandan tribunals, the trials of Charles Taylor, Radovan Karadzic, the Srebrenica genocide, and other war crimes and criminals in the Yugoslav. Finally, it frames all of those narratives and experiences within the global dynamics of legal, social and geo-political transformations, making it an excellent resource for social science researchers, human rights activists, those interested in the former Yugoslavia and international relations, and legal scholars.

Yugoslav War: A History of Violence

Israeli artist Eran Shakine is known for his cryptic, minimal drawings, especially the myriad permutations of his primary motif the Graffiti Girl, which he has painted, drawn, sprayed, and shaped for over a decade now. This publication explores for the first time all the facets of the Graffiti Girl and examines the artist's unique relationship with this defining motif in his career. Whether Eran Shakine found the Graffiti Girl or she found him is difficult to say. While listening to records, Shakine used to doodle on old magazines, and soon found that his scribbles began to assume the outline of a faceless girl. She followed him out onto the street as urban art and soon appeared in galleries in painted and sculptural form as well, often depicted in small moments of happiness—from walking the dog or riding a skateboard to experiencing her first kiss. An undefined, reduced form who is ceaselessly changing shape, the Graffiti Girl transcends class, cultural, and religious borders, and offers viewers an icon in defiance of today's troubled cultural moment.

Herbert Cooper was headed down a very different road, living a reckless lifestyle that would have destroyed him in the end, but God had a different plan. He heard the gospel at a Fellowship of Christian Athletes meeting, at which he wasn't even supposed to be, and he gave his life to Christ. Two words changed Cooper's life: But God. These two words can change every single person's life— But God. Each word is only three letters long. The phrase is short, but the implications are huge. The path may look bleak, dim, and hopeless. . . . but GOD changes everything. . . . We've all sinned - whether it is sex outside of marriage, a bitter heart, alcohol or drug abuse, cheating, or lying. Maybe you're at a place in your life where it just feels like things are falling apart. Perhaps you're portraying one thing on the outside and living something else on the inside. Maybe you are simply going through the motions of a life that's not quite what you hoped it would be. These moments drag us down - leaving us feeling hopeless and lost. You need something to happen in your life to change. You need a But God. . . .moment. The But God moments are when God comes in and offers a new path and hope for our lives. These moments occur when we are at our lowest, and turn our down-trodden worlds around for the better. It is up to us to recognize and seize these moments when they occur and follow the renewed path God offers.
