This illustrated guide is packed with interesting facts and follows the history of the famous Harley-Davidson company and the development of its famous bikes, which have earned a special place in the hearts of enthusiasts everywhere. The story dates from 1903 when Bill Harley and the Davidson brothers, with no thought of fame or fortune, decided to build a motorcycle that really worked. So successful was it, that it led to the gradual formation of a company that has survived through good times and bad. Through good times and bad, losing and winning back police contracts, as well as weathering various other vicissitudes, the company has achieved lasting success. In the end, Harley-Davidson came to the ultimate decision of giving its customers what they really wanted, not by providing year-on-year innovations, but by remaining true to the Founders' original concept. The result, as everyone knows, are bikes of mythic status, imbued with a mysterious quality of their own and generating a passion in enthusiasts amounting almost to a love affair. The name has come to personify America and is up there alongside Coca-Cola, Ford and McDonald's. The bikes are described in detail, not only in mechanical terms, but also with glorious photographs, and will be of interest to everyone who loves motorbikes: even aficionados of Japanese and European bikes, who have never even ridden a Harley-Davidson, will be able to recognize the unique marriage of style and nostalgia and the fact that there are no other bikes quite like them.

Featuring photos of beautifully restored classics as well as the hottest new bikes, it's no wonder Harley-Davidson is our best-selling calendar. Veteran photographer David Blattel painstakingly captured each bike in its perfect locale to communicate the true character of each machine.

Go on a 60-year ride with Harley-Davidson's Sportster Things got a little weird in the American motorcycle industry after World War II. People hungered for new motorcycles, buying just about everything manufacturers could build. But on rare occasions a manufacturer produced a machine that nobody wanted. Such was the case with the Harley-Davidson Model K. The Model K had most of the features buyers wanted in a modern machine, like hand-operated clutches, foot-operated shifters, and cool-running aluminum heads, but it lacked perhaps the most important technological upgrade: a modern overhead-valve valve-train design. The Model K retained the antiquated side-valve design because of arcane AMA racing rules written when Harley-Davidson and Indian competed head-to-head on American racetracks, but by 1952 Indian was on its last legs. This should have made the Model K a massive sales success. What nobody counted on was the British bike invasion. Thanks to their modern overhead-valve engines, the lightweight British bikes humiliated the side-valve Harleys on the track and on the street. Upgrades to the Model K didn't help; Harley finally relented and introduced a new overhead-valve middleweight for the 1957 model year. Dubbed the Sportster, it was everything the Model K was not. More importantly, it was faster than the British competition. Thus began the Sportster's sixty-year reign. Harley-Davidson Sportster: Sixty Years tells the complete Sportster story. Noted Sportster expert Allen Girdler covers all the bikes--the XLCH, Caf_ Racer, XR1000, XLX, 883, Iron, Forty-Eight, Seventy-Two, and Nightster--that have made the Sportster one of the most iconic motorcycles on earth.

Mercy Dillon lives in a small town in northeast Missouri and has just heard that life as she knew it is about to end. A large meteor is headed smack dab for earth. In fact it was going to hit in North America up in Canada. The powers that be had paraded scientists all over the news saying because of this hit it would cause earthquakes and possibly volcanoes to go off all over the world. They were sure the sun's light would be blocked as long as the dirt was flying around in the atmosphere and also cause winter to envelope the world for who knows how long. She had ran from the office and hopped on her Harley; headed home as fast as traffic would allow her. It didn't take but a few minutes and she could see the driveway to her apartment when she was surrounded by a myriad of other motorcycles. She looked over to see a large bearded man in a sidecar next to her smiling and getting ever closer; he seemed to be intent on grabbing her. But that couldn't be right, could it? They had her, now how to get back home.
