Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

Few paint a more vivid or varied picture of the joys of riding than this collection of stories from a motorcycling life by Lance Oliver, who has spent more time than most of us thinking about and writing about the art and practicalities of motorcycling.

An action-packed series-starter perfect for fans of *The Heroine Complex* and *Not Your Sidekick*. “I didn’t know how much I needed this brave, thrilling book until it rocked my world. *Dreadnought* is the superhero adventure we all need right now.”—Charlie Jane Anders, author of *All the Birds in the Sky* Danny Tozer has a problem: she just inherited the powers of *Dreadnought*, the world’s greatest superhero. Until *Dreadnought* fell out of the sky and died right in front of her, Danny was trying to keep people from finding out she’s transgender. But before he expired, *Dreadnought* passed his mantle to her, and those secondhand superpowers transformed Danny’s body into what she’s always thought it should be. Now there’s no hiding that she’s a girl. It should be the happiest time of her life, but Danny’s first weeks finally living in a body that fits her are more difficult and complicated than she could have imagined. Between her father’s dangerous obsession with “curing” her girlhood, her best friend suddenly acting like he’s entitled to date her, and her fellow superheroes arguing over her place in their ranks, Danny feels like she’s in over her head. She doesn’t have time to adjust. *Dreadnought*’s murderer—a cyborg named *Utopia*—still haunts the streets of New Port City, threatening destruction. If Danny can’t sort through the confusion of coming out, master her powers, and stop *Utopia* in time, humanity faces extinction.

Moving to a new Amish settlement in small-town Colorado was a brave new start for independent-minded quiltmaker Esther Kiem. But helping her reckless relative will really put her special matchmaking skills to the test . . . Mischievous and rebellious, young Ben Kiem is making the wrong kind of name for himself throughout the town of Byler. And even though his sister-in-law, Esther, somehow coaxes him into keeping company with sensible Linda Eicher, Ben can’t see anything they have in common. Or that he could ever be good enough for someone like her. But Linda’s down-to-earth nature and unexpected understanding have Ben trying his best to be better, no matter how challenging . . . Linda couldn’t be more surprised when Ben turns out to be caring and helpful, despite his rowdy pranks and bad-news friends. And falling in love with him suddenly seems just right. But when a heartbreaking misunderstanding comes between them, both she and Ben must risk enough to trust, stitch the pieces back together—and dare a forever precious happiness. Praise for Jennifer Beckstrand and Abraham “This is an endearing romance that fans of *Wanda Brunstetter* will love.” —Publishers Weekly

This book is based on the latest research on ISAR imaging of moving targets and non-cooperative target recognition (NCTR). With a focus on the advances and applications, it provides readers with a working knowledge of various algorithms of ISAR imaging of targets and implementation with MATLAB.

[...] it didn’t matter, because one word, “sure” in the context of motorcycle ownership, gave Pete permission to buy one. All he had to do now was earn the money. [...] When Ms. Strickland answered the door she looked at the stoop and noticed that it had been shoveled. Since they were both holding shovels, the first thing she said in a rhetorical tone was “Did you guys do that? Thank you!” Before they could get a word out, she continued with “I guess you are here to shovel my drive! Or did you do that too and now you want your money?” Without missing a beat, Mel replied, “Yup! Twenty bucks!” In a scolding almost frantic tone she replied with, “Well I’m not paying. I have the lawn service under contract. Not very smart business boys. You can’t just ask people to pay for a service they didn’t request!” Pete just stood there in shock when Mel said, “OK, we’ll put it back.” She paused for a moment with a look of horror on her face until she realized Mel was joking and started laughing. She said “I’m sorry boys, but I’m already committed.” Mel replied, “That’s OK, we understand.” As they were walking toward the next house, they heard Ms. Strickland’s door open and she started yelling, “Boys!?! Boys!?! Wait!” Mel and Pete exchanged glances wondering what now? “Come back! I changed my mind! You can shovel my drive!” Pete jokingly said to Mel, “It looks like we’re both gonna make \$20 on this drive since our price just doubled!”
