Most browsers will automatically download into your computer's default "Downloads" folder, but you can prompt your browser to ask you where to save your files by doing the following: Chrome — Click ? in the top-right corner, click Settings , scroll down and click Advanced , scroll down to the "Downloads" section, and click the "Ask where to save each file before downloading" switch if it's ...

Where is your hard earned money? Whether you have a savings or checking account, a 401(k), an IRA, a college fund, or dollars stuffed under the mattress, you are an investor. But you are losing every day that you sit back and let others make decisions about your money. You worked hard for it, and it's your responsibility to make it work for you. If you don't invest smartly, your very financial future is in jeopardy. But smart investing is not nearly as difficult or complicated as some might lead you to believe. In seven simple yet vital steps Dan Solin, New York Times bestselling author of The Smartest Investment Book You'll Ever Read, takes the mystery out of successful investing and shows everyone, no matter what their income or expertise in money matters, how to take control of their financial lives, ignore the "experts", and grow a nest egg. Solin's approach mirrors that of the most successful investors

in the world. He ignores the bombast of so many advisors and brokers who over-promise and under-deliver, relying instead on objective, historical, peer-reviewed data. Solin helps you separate fact from hype so that you can make intelligent, responsible investing decisions. And his simple, clear-headed advice shows you exactly how to invest your assets with an easy-to-follow plan that allows you to create and monitor your portfolio in less time than it takes to read the morning paper.

Dr. David Stevens new book, *Falling Back in Love* is ideal for any couple-whether married, engaged, or dating for any considerable time. Unlike other authors who may write about relationships, Stevens has lived and breathed this subject-helping couples for 40+ years but more importantly, has been in a loving and caring relationship for over 50. Stevens book is not only filled with sound advice, but with examples of what it means to be in a committed relationship. As the good doctor would say Forget about trying to have a perfect marriage and strive to be perfectly married. What does this mean? After you read, *Falling Back in Love* you'll understand, but more importantly, you'll be able to incorporate more love into your relationships. Sheilah Brooks, writer I felt that with the divorce rate being at 50%, this book could save couples tons of money if they want to salvage a relationship. We live in such callous times when love and commitment seem almost nonexistent. Martha Tucker

This book presents Lee Baucom's system for saving your marriage in three easy steps: connecting with your spouse, changing yourself, and creating a new path.

Create a wealth of self-worth. In a black-and-white world, there are two types of people—those who love themselves too much (and walk over everybody else) or hate themselves for failing to achieve goals (and probably end up being taken advantage of by others). But, according to British marital therapist, Andrew G. Marshall, neither has a healthy perception of oneself. This is because the secret to self-esteem does not lie in the extremes of love and hate, but in the middle, in the gray area that teaches us to love ourselves just enough: enough to have love to offer others; enough to be open to receive love from others. Only when this kind of balance is created, can self-love exist. Like no other book on self-esteem ever written, *Learn to Love Yourself Enough* helps readers walk through life on middle ground by revealing the seven factors that, together, add up to a wealth of self-worth. Examine your relationship with your parents: Discover the six types of child-parent relationships and how to accept the legacy of your past. Find Forgiveness: Debunk the two myths about forgiveness and discover what can be gained from negative experiences. Don't let other people put you down: Recognize the five phases of projection and how understanding our own projections lead to better and happy relationships. Re-program your inner voice: Identify the three kinds of negative thinking that work together to undermine self-confidence and whether they are based on fact or just opinion. Set realistic goals: Learn how perfectionism undermines self-esteem. Re-balance yourself: Understand that problems lurk in the extremes and why the middle way is the most successful way. Conquer Fears and Setbacks: Overcome the day-to-day problems that life and other people throw at us.

Provides advice for couples contemplating divorce who still hope to save their marriages, and suggests ways to deal with infidelity, depression, a midlife crisis, sexual problems, and other common issues.

In this highly-accessible self-help book *Big Issue* founder John Bird explains his seven simple rules that could help you change your life. Whether you want to get a new job, quit smoking, stop drinking or go back to college, *How to Change Your Life in 7 Steps* explains how you can take what you've been given and turn it into something you'll be proud of, rather than spend your life wishing for everything you haven't got. For 99% of us life doesn't come knocking on the door; you have to go out and get it. But the trouble with aiming for the stars is that you're likely to end up in the gutter. John Bird has learnt through

Download Free 7 Steps To Save Your Financial Life Now How To Defend Yourself Against Rigged Markets Wall Street Greed And

his work with the homeless that if you start by putting just 3% of your energy towards your final goal rather than a gutter-hitting 99% you will eventually make the changes you are looking for. John's six other rules are as straightforward as this first one, 'Start With 3%'. He writes with passion about the dangers of thinking like a victim and of not telling the truth; he shares with us the importance of thinking for yourself and never putting others down, and he encourages us not to define our successes by the failures of others and to recognise our own achievements. Written in his unique no-nonsense style this is a book about 'cutting through the bullshit and making the most of what you have.'

Despite the very best conservation and environmental policy-making efforts, at least 80,000 acres of tropical rainforest disappear each day. If action is not taken now, experts estimate that the world's rainforests will mostly disappear within 50 years. Currently, the destruction of tropical forests is responsible for 17 percent of man-made carbon emissions-more than what comes from all the world's cars, airplanes and ships combined! Tropical rainforests need our help-and that's where 50 Simple Steps to Save the World's Rainforests comes in. The future of the world's rainforests lies to a large extent in the collective hands of consumers and how they shop, since demand is what fuels the forces driving deforestation-agriculture, logging, and resource extraction. Through the 50-step journey, you will learn how, as a consumer, you may unwittingly support rainforest destruction and more importantly, precisely how you can make different choices that help save rainforests. For example, you will learn how your paper use and purchases of rayon clothing affect Indonesian rainforests where Sumatran tigers are critically endangered or how simply eating Brazil nuts helps save the Amazon rainforest. You will discover how the cultivation of palm oil, a common ingredient in confections, baked goods, soaps and biofuels, is fueling rampant deforestation in Malaysia, Indonesia and Papua New Guinea and how you can avoid it. 50 Simple Steps to Save the Rainforests is the ultimate primer for anyone wanting to take action to help save this ecosystem, which is so critical to the future of mankind.

Within you is a zone of genius that contains everything you need to live the life you were born to live! Would you like to be living your best life and operate at your highest potential in one or more pivotal areas of your life? Do you consider yourself a High Achiever, or would you like to become one?
