IF you have a manual it will have a trouble shooting guide. If you have no DC the generator or possibly a fusible link could be bad. IF you have DC and no AC that could be a fuse/breaker or a bad inverter. Your DC out should be between 12-14 volts depending on how good your meter is. The Ac is dependent on you type. Could be the outlets are 120, 208, 220, 240. If the outlets are like a normal ...
