The critical philosophy (German: kritische Philosophie) movement, attributed to Immanuel Kant (1724–1802), sees the primary task of philosophy as criticism rather than justification of knowledge. In contemporary philosophy a distinction has developed between speculative philosophy of history and critical philosophy of history, now referred to as analytic. The former questions the meaning and purpose of the historical process whereas the latter studies the foundations and implications of history and the historical method. The names of these are derived from C

Virtually every aspect of the modern Western worldview has its roots in the remarkably diverse body of philosophy that emerged from a small patch of land in the Mediterranean thousands of years ago. This volume offers an overview of the highlights of ancient Greek philosophy, as well as an historical account of the lives of many of the scholars and thinkers who helped shaped it.

Ever since Plato made the case for the primacy of ideas over names, philosophy has tended to elevate the primacy of its ideas over the more common understanding and insights that are circulated in the names drawn upon by the community. Commencing with a critique of Plato's original philosophical decision, Cristaudo takes up the argument put forward by Thomas Reid that modern philosophy has generally continued along the "way of ideas" to its own detriment. His argument identifies the major paradigmatic developments in modern philosophy commencing from the new metaphysics pioneered by Descartes up until the analytic tradition and the anti-domination philosophies which now dominate social and political thought. Along the way he argues that the paradigmatic shifts and break-downs that have occurred in modern philosophy are due to being beholden to an inadequate sovereign idea, or small cluster of ideas, which contribute to the occlusion of important philosophical questions. In addition to chapters on Descartes, and the analytic tradition and anti-domination philosophies, his critical history of modern philosophy explores the core ideas of Locke, Berkeley, Malebranche, Locke, Hume, Reid, Kant, Fichte, Hegel, Schelling, Marx, Kierkegaard, Schopenhauer, Nietzsche, Husserl and Heidegger. The common thread uniting these disparate philosophies is what Cristaudo calls "ideaism" (sic.). Rather than expanding our reasoning capacity, "ideaism" contributes to philosophers imposing dictatorial principles or models that ultimately occlude and distort our understanding of our participative role within reality. Drawing upon thinkers such as Pascal, Vico, Hamann, Herder, Franz Rosenzweig, Martin Buber and Eugen Rosensock-Huessy Cristaudo advances his argument by drawing upon the importance of encounter, dialogue, and a more philosophical anthropological and open approach to philosophy.

A team of leading international scholars examine Middle Ages and Renaissance philosophy from the perspective of themes and lines of thought that cut across authors, disciplines and national boundaries, opening up new ways to conceptualise the history of this period within philosophy, politics, religious studies and literature.

A masterful survey of the history of Marxist philosophy of science Sheehan retraces the development of a Marxist philosophy of science through detailed and highly readable accounts of the debates that shaped it. Skilfully deploying a large cast of characters, Sheehan shows how Marx and Engel's ideas on the development and structure of natural science had a crucial impact on the work of early twentieth-century natural philosophers, historians of science, and natural scientists. With a new afterword by the author.

This volume begins with the rise of German Idealism and Romanticism, traces the developments of naturalism, positivism, and materialism and of later-century attempts to combine idealist and naturalist modes of thought. Written by a team of leading international scholars this crucial period of philosophy is examined from the novel perspective of themes and lines of thought which cut across authors, disciplines, and national boundaries. This fresh approach will open up new ways for specialists and students to conceptualise the history of 19th-century thought within philosophy, politics, religious studies and
