Histomonas meleagridis, an anaerobic protozoan parasite of the order Trichomonadida, is the causative agent of histomoniasis (blackhead disease). It can exist in flagellated (8-15 mcm in diameter) and amoeboid (8-30 mcm in diameter) forms. H meleagridis is primarily transmitted in the egg of the cecal nematode, Heterakis gallinarum. Chickens and other gallinaceous birds act as a reservoir ...

~~Poultry Stunning - Sedgbeer processing~~

The broiler industry has seen one of the strongest growth in the recent past although other poultry sectors such as layer chicken farming and native chicken farming have also witnessed strong growth. That means there is a massive market for poultry feeds across the country.

"This book will provide a complete and easy-to-understand reference for the growing band of people wishing to keep their own chickens for both food and pleasure. Pitched at the novice but also containing plenty to interest the experienced chicken-keeper, the book will contain no-nonsense advice, tips, facts and step-by step sequences, as well as plenty of relevant photographs and diagrams. As more people keep chickens nowadays than at any time since the Second World War, this book is a timely addition to the Haynes range."--Publisher description.

Unlike some other reproductions of classic texts (1) We have not used OCR (Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.
