it balances a "user" and "preparer" perspective and integrates real financial information to illustrate business decision choices and how decisions are made using accounting information. The pedagogical approach presented in the text has been tried and tested over many years, and provides a constructive framework for students to learn fundamental accounting concepts and processes. Through the use of real company information and financial statements students will quickly appreciate the use of accounting information. The textbook clearly outlines to students how to account for typical business transactions and prepare financial statements - such as a balance sheet, income statement, and statement of cash flows - that communicate the financing, operating, and investing activities of a business. Whether a student is required to study one accounting subject, as part of a wider business degree, or undertake a major study of accounting the text builds a strong conceptual understanding of accounting and will develop skills that can be applied to an accounting and business environment. The integral role of financial statements for decision making is also emphasised in this text and is reinforced throughout by the Decision Toolkit in each chapter. Students are provided with an extensive set of tools necessary to make business decisions based on financial information. The fourth edition is designed to engage and

students have been successful using books written by these authors. Again, these authors bring you a one semester, undergraduate text that presents the fundamental concepts of managerial accounting in a concise and easy-to-read fashion. This edition retains the same features that made it popular in the previous editions: it gives students all the necessary techniques and concepts of managerial accounting in a focused, concise framework with an excellent pedagogy that's been praised by instructors. It does this by focusing on the tools students need to succeed. Because not all students taking this course may be accounting majors, the authors have focused more on building decision making skills; on how to use accounting information to make quality business decision; and on the tools needed by future managers. Pair this book with our new Managerial Accounting Cases by Carty and Wick for a complete solution for your Managerial Accounting needs.
