Gelinas and Dull provide an excellent intermediate level discussion of systems and controls from an accountant's perspective. They provide a grounding in how and why accountants interact with financial systems and take a dive down from the DBMS and ERP levels into specific common business process cycles and provide a strong chapter on system acquisitions.

Today's accounting professionals are expected to help organizations identify enterprise risks and provide quality assurance for their companies' information systems. Readers can rely on ACCOUNTING INFORMATION SYSTEMS, 11E's clear presentation to gain a thorough understanding of two issues most critical to accounting information systems in use today: enterprise systems and controls for maintaining those systems. ACCOUNTING INFORMATION SYSTEMS, 11E explores today's most intriguing accounting information systems (AIS) topics and details how these issues relate to business processes, information technology, strategic management, security, and internal controls. The authors focus on today's most important advancements, using a conversational tone rather than complex technical language to ensure readers develop the solid foundation in AIS needed to be successful. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Intended for a one-semester course in Accounting Information Systems taught at the sophomore, junior, or senior level at most two- and four-year schools. This revision is completely streamlined, includes new pedagogy, and is accompanied by a CD-ROM containing added coverage, making it flexible enough to suit a variety of different approaches to the course.

Today's accounting professionals are challenged to identify enterprise risks and provide quality assurance for a company's information systems. ACCOUNTING INFORMATION SYSTEMS, 11th International Edition, focuses on three critical accounting information systems in use today: enterprise systems; e-Business systems; and controls for maintaining those systems. Students will easily grasp even the most challenging topics as they explore today's most intriguing AIS topics relative to business processes, information technology, strategic management, security, and internal controls. The 11th International Edition provides students with the tools for organising and managing information to help them succeed and protect the integrity of their employer's information system.

Information technology has permeated all walks of life in the past two decades. Accounting is no exception. Be it financial accounting, management accounting, or audit, information technology and systems have simplified daily tasks and routine work, simplified reporting, and changed how accounting is done. The Routledge Companion to Accounting Information Systems provides a prestige reference work which offers students and researchers an introduction to current and emerging scholarship in the discipline. Contributions from an international cast of authors provides a balanced view of both the technical underpinnings and organisational consequences of accounting information systems. With a focus on the business consequences of technology, this unique reference book will be a vital resource for students and researchers involved in accounting and information management.

Forensic Accounting provides comprehensive coverage of fraud detection and deterrence and includes the broader educational material of the forensic accounting field with all the necessary accompaniments. The text follows the model curriculum for education in fraud and forensic funded by the U.S. national Institute of Justice and developed by a Technical Working Group of experts in the field. The text serves as a comprehensive and authoritative resource for teaching forensic accounting concepts and procedures that is also and appropriate and pedagogically ready for class room use. This easy to read, comprehensive textbook includes case study examples to clearly explain technical concepts and bring the material to life.

I started writing my book the first day that I started taking classes at College of the Canyons. I didn't write the book in printing, I wrote in my heart. The title of my book is My Graduation, because I finished the day I graduated. I took my first class in the spring semester of 1989, my final class in the spring semester of 2005. My book talks about my struggles to get an education while raising a family, as well as the nostalgia for my old country and my love for my new country. In my book, I invite people to read and write. I also want to send a message of love and hope for a better life. How I wish that every immigrant learns English as soon as they come to this country. How I wish that every woman would achieve a college education. Yes, it is hard, but not impossible. The young woman that came to this country, with a big desire of an education, finally did it.
