A deeply personal account of Elton John's life during the era of AIDS and an inspiring call to action. In the 1980s, Elton John saw friend after friend, loved one after loved one, perish needlessly from AIDS. He befriended Ryan White, a young Indiana boy ostracized because of his HIV

infection. Ryan's
inspiring life and
devastating death led
Elton to two
realizations: His own
life was a mess. And he
had to do something to
help stop the AIDS
crisis. Since then, Elton
has dedicated himself to
overcoming the plague
and the stigma of AIDS.
The Elton John AIDS
Foundation has raised

and donated \$275 million to date to fighting the disease worldwide. Love Is the Cure includes stories of Elton's close friendships with Ryan White, Freddie Mercury, Princess Diana, Elizabeth Taylor, and others, and the story of the Elton John AIDS Foundation. Sales of Love Is the Cure benefit

One in six adults in sub-Saharan Africa will die in their prime of AIDS. It is a stunning cataclysm, plunging life expectancy to pre-modern levels and orphaning millions of children. Yet political trauma does not grip Africa. People living

Online Library Aids Update

with AIDS are not rioting in the streets or overthrowing governments. In fact, democratic governance is spreading. Contrary to fearful predictions, the social fabric is not being ripped apart by bands of unsocialized orphan children. AIDS and Power explains why social and political life in Africa goes on in a

remarkably normal way,
and how political
leaders have
successfully managed
the AIDS epidemic so
as to overcome any
threats to their power.
Partly because of
pervasive denial, AIDS
is not a political priority
for electorates, and
therefore not for
democratic leaders
either. AIDS activists

Online Library Aids Update

2012 Textbook
have not directly challenged the political order, instead using international networks to promote a rights-based approach to tackling the epidemic. African political systems have proven resilient in the face of AIDS's stresses, and rulers have learned to co-opt international AIDS efforts to their own

political ends. In contrast with these successes, African governments and international agencies have a sorry record of tackling the epidemic itself. AIDS and Power concludes without political incentives for HIV prevention, this failure will persist.

Few people realize that
Page 51/59

Online Library

Aids Update

the familiar HIV/AIDS global statistics are actually estimates. For example, UNAIDS estimated that the Republic of South Africa had 140,000 HIV/AIDS deaths in 1997. However, after tabulating all deaths for 1997, the Republic of South Africa attributed only 6,635 deaths to HIV/AIDS. Such

Online Library Aids Update

discrepancies are rarely noted. The Republic of South Africa (RSA) stands as the exemplar of these discrepancies, and is reputed to have the world's largest AIDS epidemic with an estimated 5.6 million people living with HIV/AIDS (PLWH) in 2008. Such PLWH estimates, as with the estimates of HIV/AIDS

deaths, are highly questionable. The reasons behind these discrepancies are clarified by describing two common misunderstandings of HIV infection that contribute to poor mathematical modeling outcomes.

Unfortunately, the health authorities in the Republic of South

Online Library Aids Update

2012 Textbook Africa grant more

validity to computer-generated estimates than to their own empirical death counts. The author discusses why these modeled estimates, and the HIV sero-prevalence surveys upon which they are based, are simply implausible. Presented with full references are raw numerical data on: the

HIV/AIDS deaths in the

The total cumulative

HIV/AIDS cases in the United States and Africa are also presented for comparison, and to place the African and RSA data within appropriate epidemiological context. Overall, these data span from 1981 to 2009. Altogether, these data, plus additional information detailing the nature of HIV

infection and heterosexual HIV transmission rates, explain why the hyperbolic mathematical estimates and HIV antibody test surveys - the primary sources of HIV/AIDS data in Africa - are simply implausible.
