Ten years have passed since the original edition of this book was published, but Alfa Romeo enthusiasts everywhere are more active today than ever in preserving, modifying and racing these excellent cars. Throughout this time, the author in true Alfista fashion, never stopped looking for and trying new techniques to increase the power, overall performance and reliability of Alfas and their engines. This book is the result of much research, and also first-hand experience gained through many Alfa rear wheel drive model projects, from the 105 series to the last of the 75 models. There is a lot of completely new information regarding TwinSpark Cylinder head mods, big-brake mods, LSD adjustment procedure, electrical system improvements, plus many flow-bench diagrams, dyno plots, and much more.

Following in the tracks of the author ' s well-known Alfa DOHC tuning manual, Jim Kartalamakis describes all kinds of useful information and techniques to increase power, performance and reliability of V6 Alfas and their engines. This book is the result of much research and firsthand experience gained through many projects concerning Alfa V6 rear-wheel drive models, from the GTV6 series to the last of the 75 3.0 models. A wealth of completely new information can be found here regarding cylinder head mods, big brake mods, LSD adjustment procedure, suspension modifications for road and track, electrical system improvements, flowbench diagrams, dyno plots, and much more!

Access Free Alfa 147 Engine Diagram

A small investment in this book could save you a fortune. With the aid of this book's step-by-step expert guidance, you'll discover all the information you need to know about the Alfa Romeo Giulia GT Coupe you want to buy. Unique point system will help you to place the car's value in relation to condition. This is an important investment-don't buy a car without this book's help.

Whether you want to go racing or have maximum street performance, the expert advice in this book will help you to build a powerful and reliable engine first time-without wasting money on incompatible components or modifications that don't work. Covers 1300, 1600, 1750, 1800 and 2000 dohc engines (not Twin Spark). Also offers advice on suspension, brakes, steering and gearing.

These important Sports Racing cars of 1967-1977 won the 1975 and 1977 Manufacturers World Championships. The definitive record, this is also the first book to be written about the history and development of Alfa Romeo's fabulous Championship-winning Tipo 33 prototypes. Containing many previously unseen photographs and interviews with key personalities, this is a vital addition to any Alfa enthusiasts collection.

Alfa Romeo 916 GTV and Spider traces the complete story of the Alfa Romeo GTV and Spider models produced between 1994 - 2005, commonly known to enthusiasts by the manufacturer's project code as the 916 series. The 916 models would always be controversial - they replaced the iconic Spider, the best-selling Alfa Romeo sports model of all time, and the brand-establishing Alfetta GTV. Sharing components and a platform with a humble Fiat hatchback, would the cars ever be considered 'real' Alfa Romeos? The cars were critically acclaimed, and, though they faced tough competition in the late 1990s from the likes of the Audi TT, they remained in production for over a decade. Topics covered include: Full history of the 916 series GTV and Spider models; Design, development and evolution of the models from 1994 - 2005; Participation of the GTV in motorsport; Model variations in depth through all three facelifts; Previously unpublished production figures, and chassis numbers for the desirable, limited-edition GTV Cup model. Comprehensively researched guide to the entire lifespan of the 916 series. Will appeal to Alfa Romeo and automotive enthusiasts. The history and design process are examined along with an in-depth guide to each of the model variants produced. The cars' current position in the classic car market is considered. Superbly illustrated with 240 colour photographs. Robert Foskett is a life-long Italian car enthusiast with a special interest in Alfa Romeo.

Buying a car is an expensive business and mistakes can prove costly. Wouldn't it be great if you could take an expert with you? With the aid of this book's step-by-step guidance from a marque specialist, you can! The unique points system will help to place the car's value in relation to condition while extensive photographs illustrate the problems to look out for.

After saving Alfa Romeo from oblivion in 1987, it took Fiat nearly five years to debut the first new Alfa produced under its control. This is the story of how the competition versions of the 155/156/147 family of cars were developed and subsequently raced to many championship titles and race wins. Alfa Romeo's 155 saloon was a comprehensively successful racing touring car that won the German and world-wide DTM Championship, and later ITC races. The model also took on the role of representing the company in national touring car championships throughout the world, most notably winning the British Touring Car Championship in 1994. The 156 was Alfa's successor to the 155 and was also raced with much success. This book follows the development and competition history of this model too, along with its sibling, the 147. Together, these models kept the Alfa Romeo name at the pinnacle of motor sport for many years, from 1992 to 2006, and will become future motorsport classics.
