to the pursuit of passive income.

Theoretically, you put in some time and money in the start, then relax and let the money pour in when you focus on other things. This appears like a dream become a reality, but it's mostly only a dream. In today's workforce, relying on one income source is risky. Job protection is rarely guaranteed, and a little extra cash is useful always. By using your primary income source to cover basic expenses, you may use extra income streams to pay off debts, reduce your economic burden, or avoid going further into debt when you are able to pay for larger purchases up front rather than with a credit card or loan. Conversely, passive income is cash that continues to pay out following the initial work is done. Traditionally, income that were considered "passive" generally included money earned from investments in shares or profit acquired by a person who had invested in accommodations property but wasn't involved in the management or day-to-day functions of that property.
