Augmentative and Alternative Communication Intervention: An Intensive, Immersive, Socially Based Delivery Model is ideal for school-based speech-language pathologists (SLPs) and an excellent resource for interventionists (special education teachers, ABA therapists) and SLPs working in other settings who wish to develop an intensive, immersive Augmentative and Alternative Communication (AAC)-based intervention through a three-phase intervention process: assessment, intervention planning, and intervention implementation. Written by an SLP who has worked in a public school setting and saw to the application of theory to practice, the text provides detailed information regarding working with children who have complex communication needs and the background knowledge necessary for successful implementation of the intervention approach. Included are considerations for vocabulary selection for the beginning communicator, how to create a symbolically rich environment, detailed intervention approaches, and progress monitoring strategies that establish appropriate, measurable goals. AAC will no longer be an alternative means of communication but a best practice means of teaching communication in the SLP's or interventionist's repertoire. Making the leap from the theoretical to the practical, this essential book: Describes the intervention needs of children with complex communication needs and the limitations of current approaches (e.g., PECS, Milieu Training, Functional Communication Training).Operationally defines the goal of AAC intervention, discussing its complexities, including the limitations of a pull-out model.Introduces the Intensive, Immersive, Socially Based Approach to Intervention and briefly describes each phase of the intervention process.Discusses how AAC assessments differ from traditional assessments of speech and language skills, as well as provides an overview of different assessment models and their contribution to the intervention process.Examines the importance of training support staff to key components of this intervention model.Contains information on the application of language-based intervention strategies to AAC.Talks about the importance of progress monitoring and how to use functional communication measures and communication sampling, a new and innovative technique developed by the author, to monitor progress.Provides example lesson plans and example goals addressing each area of communicative competence.*Disclaimer: Please note that ancillary content (such as documents, audio, and video, etc.) may not be included as published in the original print version of this book.

As AAC use continues to flourish and new technology revolutionizes the field, tomorrow''s service providers need current, authoritative information on AAC for children and adults with communication disorders. That''s why David Beukelman and Pat Mirenda have revised and updated the bestselling Augmentative and Alternative Communication-the trusted, widely adopted graduate-level text on communication disorders and AAC. The foundational textbook for SLPs, OTs, PTs, teachers, and other professionals in clinical and educational settings, this fourth edition is a definitive introduction to AAC pr.

Children with pervasive developmental disorders often do not learn from conventional methods, which can result in social isolation, behavior problems, limitations in communication, and slow academic growth. Greater integration into home and school activities, improved behavior and academic success can be achieved using alternative-augmentative communication (AAC), and this book explains exactly how to make it happen. Exploring the various communication and intervention options available and offering straightforward techniques and strategies for using them effectively, this book clearly explains everything families, teachers, therapists and other professionals need to know in order to improve a child's communication, behavior, social and academic skills. Chapters follow a consistent, user-friendly format, answering the questions Who, What, Why, How, Where and When about every technique. This book will be essential reading for anyone looking to improve social interaction between children with pervasive developmental disorders and those around them.

What Every Speech-Language Pathologist and Audiologist Should Know about Alternative and Augmentative Communication is designed as a basic introduction to the study of Alternative and Augmentative Communication. This brief, five chapter text provides readers with a basic overview of what Alternative and Augmentative Communication is and who might benefit from its use. Characteristics of this population are discussed, and case examples are provided. In addition, descriptions of the settings in which Speech Language Pathologists are likely to work with people who use Alternative and Augmentative Communication and team members who might be involved are included. The book concludes with an overview of basic principles of assessment and key considerations for providing Alternative and Augmentative interventions.
