In Recording History, Peter Martland uses a range of archival sources to trace the genesis and early development of the British record industry from 1888 to 1931. A work of economic and cultural history that draws on a vast range of quantitative data, it surveys the commercial and business activities of the British record industry like no other work of recording history has before. Martland's study charts the successes and failures of this industry and its impact on domestic entertainment. Showcasing its many colorful pioneers from both sides of the Atlantic, Recording History is first and foremost an account of The Gramophone Company Ltd, a precursor to today's recording giant EMI, and then the most important British record company active from the late 19th century until the end of the second decade of the twentieth century. Martland's history spans the years from the original inventors through industrial and market formation and final take-off including the riveting battle in recording formats. Special attention is given to the impact of the First World War and the that followed in its wake. Scholars of recording history will find in Martland's study the story of the development of the recording studio, of the artists who made the first records (from which some like Italian opera tenor Enrico Caruso earned a fortune), and the change records wrought in the relationship between performer and audience, transforming the reception and appreciation of musical culture. Filling a much-needed gap in scholarship, Recording History documents the beginnings of the end of the contemporary international record industry."

Immune-mediated neurological disorders present an increasing challenge to neurologists. Recent advances have identified new antibodies, new effector mechanisms and new diagnostic tests; these have greatly enhanced our understanding of disease aetiology and opened up therapeutic opportunities, but a critical understanding of this fast-developing field is not easy to find. This volume was conceived following a very successful course on neuroimmunology in Bergamo in 2000, and was written mainly by clinicians who are active in the laboratory. It will help to keep practising neurologists and neuroimmunologists abreast of the most recent developments, and to assess new information more critically. Angela Vincent and Gianvito Martino should be congratulated on master-minding this timely and practical text. July 2001 J. Newsom-Davis Professor Emeritus University of Oxford Table of Contents Introduction -Approaches to Understanding Immune-Mediated Neurological Disorders: Measuring and Evaluating Autoantibodies to Neuronal Antigens G. MARTINO, A. VINCENT

Make Your Own Diagnostic Equipment (MYODE) This book, "Make Your Own Diagnostic Equipment" came about from the need of many readers and viewers to be able to make and maintain fairly simple diagnostic gadgets. It is meant to show and guide the professional technician and DIY mechanic on how to make these gadgets. In many cases, due to the nature of the equipment industry, it is very expensive or virtually impossible to get these tools. The reason being is that often times tool makers don't see a profit in making these simple but effective gadgets. Most, if not all of these tools, are invaluable in diagnosing modern automotive systems. You can estimate that having one of these tools, at the right time when needed, will cut your diagnostic time by at least 50%. Of course, knowing how to use it is also important. However, by definition if you've already studied how the gadget works, how to build it and also ended up building it yourself, you've already passed the learning curve and chances are you'll know how to use it. At the very least, reading this book will put you in a much better position to also assess diagnostic issues and on the use of other important tools of automotive diagnostics. It is our hope with this work to enlighten the professional and DIY mechanic on the use, construction and operation of modern automotive diagnostic gadgets. Use this information to the best of your abilities and be on the diagnostic driver seat. This book is an abridgment of my earlier work entitled, Adh-Dhikr wad-Du'a wal-'Ilaj bir-Ruqyah mina'-Kitab was-Sunnah. In order to make it small and easily portable, I have chosen only the section on words of remembrance for this abridgment. To achieve this, I only mentioned the text of the words of remembrance instead of the entire Hadith. I also limited myself to mentioning only one or two references from the original book for each Hadith. Whoever would like to know about the Companion who related a particular Hadith, or more information about where it is recorded, should refer to the original work (mentioned above). I ask Allah the Glorious, the Mighty, by His beautiful Names and by His sublime Attributes to accept this as having been done sincerely for His sake alone. I ask Him to bring me its benefits during my lifetime and after my death. May those who read it, those who print it, or have had any role in distributing it, benefit from it also. Surely He, glory be unto Him, is Capable of all things. May the peace and blessings of Allah be upon our Prophet, Muhammad, and upon his family and Companions and whoever follows them in piety until the Day of Judgment. Said bin Ali bin Wahaf Al-Qahtani, Safar, 1409
