Headphones can be considered loudspeakers that were specifically created to be placed over the ears of user's. They are electrical devices that convert electrical signals into sounds to be heard by the user. The main function of a headphone is to provide users with the ability to use them to privately listen to audio recordings. This is in direct contrast to a speaker that allows everyone in close proximity to hear the sound. Sometimes headphones can be referred to as ear speakers. There are many different types of headphones that have different audio reproduction abilities. They range from lightweight ear buds to heavy bass-pumping full-sized headphones that produce amazing output. These can offer a range of sound that, to date has remained a phenomenon. It allows audiophiles to hear every sound note and accurately identify every pitch. The average user will unlikely be able to differentiate the various sounds and pitches. An experienced listener, however, is more likely to easily identify the difference.

Apple's iPods continue to set the bar for media players, with bold new features like the Touch's supersized screen and Siri voice control. But iPods still lack a guide to all their features. That's where this full-color book comes in. It shows you how to play music, movies, and slideshows; shoot photos and videos; and navigate Apple's redesigned iTunes media-management program. The important stuff you need to know: Fill it up. Load your iPod with music, photos, movies, TV shows, games, ebooks, and podcasts. Manage your stuff. Download media and apps from the iTunes and App Stores, then organize your collection. Tackle the Touch. Send email and instant messages, make FaceTime calls, and shoot photos and HD video with the Touch's 5-megapixel camera. Go wireless. Use the Touch's new iOS 6 software to sync content wirelessly. Relish the Nano. Enjoy video and photos on the Nano's new big screen, and chart your workouts with the Nike+ pedometer. Master the Shuffle and Classic. Get mucho music on the little Shuffle, and use the Classic's giant hard drive to tote around your audio and video collections. Pump it up. Blast iPod tunes through your home and car stereo.

This book examines how pacemakers and defibrillators participate in transforming life and death in high-tech societies. In both popular and medical accounts, these internal devices are often portrayed as almost magical technologies. Once implanted in bodies, they do not require any 'user' agency. In this unique and timely book, Nelly Oudshoorn argues that any discourse or policy assuming a passive role for people living with these implants silences the fact that keeping cyborg bodies alive involves their active engagement. Pacemakers and defibrillators not only act as potentially life-saving technologies, but simultaneously transform the fragility of bodies by introducing new vulnerabilities. Oudshoorn offers a fascinating examination of what it takes to become a resilient cyborg, and in the process develops a valuable new sociology of creating 'resilient' cyborgs.

This is the coursebook for Engineering Communication I, a one-semester, 2-credit course that aims to enhance students' abilities in academic communication related to their studies in engineering as well as in professional communication. Professional engineers not only need expert knowledge relating to engineering, but they also need to be able to communicate that knowledge, both to their professional colleagues and also to the wider community. This coursebook is designed specifically for the Engineering Communication I course which aims to help improve students' skills in both areas of communication. Accessibly written and rigorously researched, it provides up-to-date, engineering-specific vocabulary and exercises to assist students in mastering Engineering Communication I. Please note: As HW0001 English Proficiency is a co-requisite for this course, please ensure that you have completed the course, signed up for it this semester or obtained exemption from this requirement.
