cheese makers, and butteries, where farm-to-table dining has been practiced for centuries. Meticulously researched and reported, this sumptuous cookbook includes 250 recipes and more than 100 photographs of the pubs, the people, and the emerald Irish countryside taken by award-winning photographer Christopher Hirsheimer. Rich with stories of the food and people who make Ireland a wonderful place to eat, and laced with charming snippets of song, folklore, and poetry, *The Country Cooking of Ireland* ushers in a new understanding of Irish food.

Following the success of their 2010 James Beard Foundation Best Cookbook of the Year, *The Country Cooking of Ireland*, Colman Andrews and Christopher Hirsheimer achieve the formidable feat of illuminating the world's most beloved cuisine in an entirely new light. Drawing on more than 40 years of experience traveling and eating in Italy, Andrews explores every region, from Piedmont to Puglia, and provides the fascinating origins of dishes both familiar and unexpected. This gloriously photographed keepsake depicts an ingredient-focused culture deeply rooted in rural traditions, in which even the most sophisticated dishes derive from more basic fare. With 230 sumptuous recipes highlighting the abundant flavors of the land, all set against the backdrop of Andrews' vivid storytelling and Hirsheimer's evocative images, this luxe book is sure to delight home chefs and lovers of Italian food alike.

The sweeping story of how the greatest minds of the Scientific Revolution applied their new ideas to people, money, and markets—and along the way, invented modern finance. **LONGLISTED FOR THE FINANCIAL TIMES AND MCKINSEY BUSINESS BOOK OF THE YEAR AWARD** • “An astounding episode from the early days of financial markets that to this day continues to intrigue and perplex historians . . . narrative history at its best, lively and fresh with new insights.”—Liaquat Ahamed, Pulitzer Prize-winning author of *Lords of Finance* *Money for Nothing* chronicles the moment when the needs of war, discoveries of natural philosophy, and ambitions of investors collided. It's about how the Scientific Revolution intertwined with finance to set England—and the world—off in an entirely new direction. At the dawn of the eighteenth century, England was running out of money due to a prolonged war with France. Parliament tried raising additional funds by selling debt to its citizens, taking in money now with the promise of interest later. It was the first permanent national debt, but still they needed more. They turned to the stock market—a relatively new invention itself—where Isaac Newton's new mathematics of change over time, which he applied to the motions of the planets and the natural world, were fast being applied to the world of money. What kind of future returns could a person expect on an investment today? The Scientific Revolution could help. In the hub of London's stock market—Exchange Alley—the South Sea Company hatched a scheme to turn pieces of the national debt into shares of company stock, and over the spring of 1720 the plan worked brilliantly. Stock prices doubled, doubled again, and then doubled once more, getting everyone in London from tradespeople to the Prince of Wales involved in money mania that consumed the people, press, and pocketbooks of the empire. Unlike science, though, with its tightly controlled experiments, the financial revolution was subject to trial and error on a grand scale, with dramatic, sometimes devastating, consequences for people's lives. With England at war and in need of funds and “stock-jobbers” looking for any opportunity to get in on the action, this new world of finance had the potential to save the nation—but only if it didn't bankrupt it first.

This book provides a detailed examination of Japan's diplomatic relations in the 1950s, an important decade in international affairs when new structures and systems emerged, and when Japan established patterns in its international relationships which continue today. It examines the process of Japan's attempts to rehabilitate itself and reintegrate into a changing world, and the degree of success to which Japan achieved its goals in the political, economic and security spheres. The book is divided into three parts, each containing three chapters: Part I looks at Japan in the eyes of the Anglo-American powers; Part II at Japanese efforts to gain membership of newly forming regional and international organizations; and Part III considers the role of domestic factors in Japanese foreign policy making. Important issues are considered including Japanese rearmament and the struggle to gain entry into the United Nations. In contrast to much of the academic literature on post-war Japanese diplomacy, generally presenting Japan as a passive actor of little relevance or importance, this book shows that Japan did not simply sit passively by, but formed and attempted to instigate its own visions into the evolving regional and global structures. It also shows that whilst Japan did not always figure as highly as its politicians and policy makers may have liked in the foreign policy considerations of other nation states, many countries and organizations did attach a great deal of importance to re-building relations with Japan throughout this period of re-adjustment and transformation.
