The 8th Edition of this popular text has been revised and updated to reflect the latest developments in the field. It explores the complete range of parasites that prey on humans; the diseases that they cause; their modes of acquisition, transmission, and epidemiology; and their pathogenesis, diagnosis, treatment, and prevention. Now presents updates on parasitic infections in immunocompromised hosts, and includes additional chapters on newly recognized human parasites. Features new illustrations and drawings of helminthic lifecycles. Contains over 290 illustrations!

This work (the third edition) contains all the preparations that are used as veterinary drugs and medicines. It describes them according to their pharmacological and therapeutic classifications. Information is included in the text concerning the mechanisms of action of the drugs, side effects and dosages. All the drugs included here are suitable for use with both domestic and non-domestic species. The book aims to promote rational and effective treatment by grouping together the similar preparations of each drug.

Logically organized by body system, this comprehensive resource provides in-depth coverage of the structure and function of the cells, tissues, and organs of a wide range of domestic animal species. Bridging the gap between the physiology and the gross anatomy of organisms, it also explores new discoveries being made in the areas of molecular biology and cytogenetics. Full-color coverage throughout, including more than 400 color figures that are grouped into major sections for quick reference. A wealth of electron micrographs and color micrographs demonstrate cell, tissue, and organ structure. A complete art program integrates illustrations and diagrams of cells and tissues to highlight structural-functional correlates. Helpful tables of histological features in each chapter summarize key concepts. A succinct style and format makes it easy to quickly find important information. Chapters begin with a list of key points. The author is a trained morphologist and has taught veterinary histology at the University of Florida College of Veterinary Medicine for more than 15 years.

Roitt's Essential Immunology has established itself as the book of choice for students of immunology worldwide. This excellent textbook is commonly regarded as 'the best of the immunology primers' and the tenth edition remains at the cutting edge of this fascinating area of science. The trademark of this book is its highly readable introduction to the subject, its emphasis on core knowledge and its excellent four-color artwork. On the tenth edition, Ivan Roitt is joined by Peter Delves, a brilliant teacher from University College London. Together they have extensively updated all aspects of the book to produce a new edition, which will be an invaluable resource to students of immunology and medicine. The tenth edition focuses on: dendritic cells, intraepithelial lymphocytes, NKT and gd T-cells, NK receptors, non-classical MHC presentation of non-peptidic antigens, analysis of TCR-peptide-MHC interactions, gene

When you're looking for a comprehensive and reliable text on large animal reproduction, look no further! the seventh edition of this classic text is geared for the undergraduate student in Agricultural Sciences and Veterinary Medicine. In response to reader feedback, Dr. Hafez has streamlined and edited the entire text to remove all repetitious and nonessential material. That means you'll learn more in fewer pages. Plus the seventh editing is filled with features that help you grasp the concepts of reproduction in farm animals so you'll perform better on exams and in practice: condensed and simplified tables, so they're easier to consult an easy-to-scan glossary at the end of the book an expanded appendix, which

Reach for the text that's revised with the undergraduate in mind: the seventh edition of Hafez's Reproduction in Farm Animals.

These guidelines were prepared on the basis of technical advice provided to WHO prior to and during a consultation of experts convened in Geneva in September 1992. The consultation included representatives of international and nongovernmental organizations and government departments with a wide range of experience and background in the health, management, and human rights aspects of HIV/AIDS in prisons. The guidelines provide standards - from a public health perspective - which prison authorities should strive to achieve in their efforts to prevent HIV transmission in prisons and to provide ca.

Advanced machining processes has significant contributions to the manufacturing industries, especially since many new invented materials have advanced properties, which are difficult to machine using conventional machining processes. Therefore, advanced machining processes take a lead in dealing with these types of material. This book focuses on electrical machining and electrical dressing processes. Chapter 1 explains the electrochemical machining (ECM), includes process parameters that involved in the ECM processes. Chapter 2 deals with another advanced machining process, i.e. electro-discharge machining (EDM). Several process parameters that contribute to the EDM processes are also discussed. Electrical dressing is described in Chapter 3 as a special application of ECM and EDM. Finally, other
