An up-and-down journey. Philip Blair - accompanied by a most loyal partner, and motivated by the sense that it is the road he is appointed to take - forged a career living and working in three distinct professions in six countries of the Middle East. Along the way there are some unexpected blips as well as a few touching - occasionally amusing - moments. Through this engaging odyssey, the reader learns both about the rich - though often disturbed - history of a region that has yet to find itself, and of occasional personal experiences of ugly or unsavoury situations. Photographs, enhanced by evocative sketches by Joanna Blair, help the reader stay on board through a slightly stormy voyage.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.
