On the night of March 26, 1938, nuclear physicist Ettore Majorana boarded a ship, cash and passport in hand. He was never seen again. In A Brilliant Darkness, theoretical physicist João Magueijo tells the story of Majorana and his research group, " the Via Panisperna Boys, " who discovered atomic fission in 1934. As Majorana, the most brilliant of the group, began to realize the implications of what they had found, he became increasingly unstable. Did he commit suicide that night in Palermo? Was he kidnapped? Did he stage his own death? A Brilliant Darkness chronicles Majorana's invaluable contributions to science—including his major discovery, the Majorana neutrino—while revealing the truth behind his fascinating and tragic life.

Consists of separately numbered series of publications of the Parlamento as a whole, the Senato, and the Camera dei deputati. Each session is divided into Disegni di leggi; Documenti; and: Discussioni.

Rappresentare con verità storica, anche scomoda ai potenti di turno, la realtà contemporanea, riportandola al passato e proiettandola al futuro. Per non reiterare vecchi errori. Perché la massa dimentica o non conosce. Denuncio i difetti e caldeggio i pregi italiani. Perché non abbiamo orgoglio e dignità per migliorarci e perché non sappiamo apprezzare, tutelare e promuovere quello che abbiamo ereditato dai nostri avi. Insomma, siamo bravi a farci del male e qualcuno deve pur essere diverso!

A century after his birth, Ettore Majorana is rightfully considered one of the greatest physicists of the first half of the last century. With this volume the Italian Physical Society presents a collection of Ettore Majorana's scientific papers in the original language and, for the first time -- with three exceptions -- translated into English. Each paper is then followed by a comment in English of an expert in the scientific field.

The career of Ettore Majorana, a highly renowned theoretical physicist, was brief but very intense, and he disappeared in March 1938 in circumstances that still are not completely clear. This volume examines his scientific, academic and human personality.

This book attempts to answer the question: "How can Europe 2020, the EU's new strategy for smart, sustainable and inclusive growth, lead to a stronger social EU with less poverty and greater social cohesion?" Examined in depth are achieving the EU's ambitious social objectives to lift at least 20 million people out of the risk of poverty and exclusion by 2020 and the Union's four other mutually reinforcing targets. A key objective of the book is to take a critical look at and draw lessons from the past, 2000-2010 Lisbon Strategy. Another important objective is to explore the format and role of EU coordination and cooperation in the social field in the new EU governance framework, in a context marked by slow recovery after the global economic crisis. Finally, the book also makes proposals for the further reinforcement of this coordination and cooperation and for the improvement of the different instruments available at EU, national and sub-national levels.
