epistemological, cultural, economic, and political dependence created by colonialism and coloniality.

A state-of-the-art anthology of postcolonial theory and practice in the Latin American context.

Postcolonial Europe: Comparative Reflections after the Empires brings together scholars from across disciplines to rethink European colonialism in the light of its vanishing empires and the rise of new global power structures.

This book outlines what theory for a global age might look like, positing an agenda for consideration, contestation and discussion, and a framework for the research-led volumes that follow in the series. Gurminder K. Bhambra takes up the classical concerns of sociology and social theory and shows how they can be rethought through an engagement with postcolonial studies and decoloniality, two of the most distinctive critical approaches of the past decades.

Focusing on piracy in the seventeenth century, filibustering in the nineteenth century, intracolony migrations in the 1930s, metropolitan racializations in the 1950s and 1960s, and feminist redefinitions of creolization and sexile from the 1940s to the 1990s, this book redefines the Caribbean beyond the postcolonial debate.

The dynamics of coloniality of power in Guatemala as expressed in the racialized, classed and gendered genocide, citizenship and in peoples' resistance.

Global imperial designs, which have been in place since conquest by western powers, did not suddenly evaporate after decolonization. Global coloniality as a leitmotif of the empire became the order of the day, with its invisible technologies of subjugation continuing to reproduce Africa's subaltern position, a position characterized by perceived deficits ranging from a lack of civilization, a lack of writing and a lack of history to a lack of development, a lack of human rights and a lack of democracy. The author's sharply critical perspective reveals how this epistemology of alterity has kept Africa ensnared within colonial matrices of power, serving to justify external interventions in African affairs, including the interference with liberation struggles and disregard for African positions. Evaluating the quality of African responses and available options, the author opens up a new horizon that includes cognitive justice and new humanism.

This book makes trouble: it explores the reality that digital culture is largely an extension of an older coloniality of power of the global north. It suggests a line of inquiry for the social sciences

to reflect on their own imperial role and develop a contemporary critical and pragmatic scope, shifting their gaze from problems to opportunities.

Soviet postcolonial studies is an emerging field of critical inquiry, with its locus of interest in colonial aspects of the Soviet experience in the USSR and beyond. The articles in this collection offer a postcolonial perspective on Baltic societies and cultures – that is, a perspective sensitive to the effects of Soviet colonialism. The colonial situation is typically sustained by the help of colonial discourses which carry the pathos of progress and civilization. In Soviet colonial discourse, the pathos of progress is presented in terms of communist value systems, which developed certain principles of the European Enlightenment and rearticulated them through Soviet ideology. This collection explores the establishment of Soviet colonial power structures, but also strategic continuities between Soviet and Tsarist rule and the legacy of Soviet colonialism in post-Soviet Baltics. Soviet norms and rules, imposed upon the Baltic borderlands, produced new forms of transculturation, gave birth to new cultural ‘authenticities,’ and developed complex entanglements of colonial, modern and national impulses. Analyses of colonial patterns in Soviet and post-Soviet Baltic societies helps bring us closer to understanding the Soviet legacy in the former Soviet borderlands and in present-day Russia. The chapters were originally published in a special issue of the Journal of Baltic Studies.
