The routine jobs of yesterday are being replaced by technology and/or shipped off-shore. In their place, job categories that require knowledge management, abstract reasoning, and personal services seem to be growing. The modern workplace requires workers to have broad cognitive and affective skills. Often referred to as "21st century skills," these skills include being able to solve complex problems, to think critically about tasks, to effectively communicate with people from a variety of different cultures and using a variety of different techniques, to work in collaboration with others, to adapt to rapidly changing environments and conditions for performing tasks, to effectively manage one's work, and to acquire new skills and information on one's own. The National Research Council (NRC) has convened two prior workshops on the topic of 21st century skills. The first, held in 2007, was designed to examine research on the skills required for the 21st century workplace and the extent to which they are meaningfully different from earlier eras and require corresponding changes in educational experiences. The second workshop, held in 2009, was designed to explore demand for these types of skills, consider intersections between science education reform goals and 21st century skills, examine models of high-quality science instruction that may develop the skills, and consider science teacher readiness for 21st century skills. The third workshop was intended to delve more deeply into the topic of assessment. The goal for this workshop was to capitalize on the prior efforts and explore strategies for assessing the five skills identified earlier. The Committee on the Assessment of 21st Century Skills was asked to organize a workshop that reviewed the assessments and related research for each of the five skills identified at the previous workshops, with special attention to recent developments in technology-enabled assessment of critical thinking and problem-solving skills. In designing the workshop, the committee collapsed the five skills into three broad clusters as shown below: Cognitive skills: nonroutine problem solving, critical thinking, systems thinking
Interpersonal skills: complex communication, social skills, team-work, cultural sensitivity, dealing with diversity
Intrapersonal skills: self-management, time management, self-development, self-regulation, adaptability, executive functioning
Assessing 21st Century Skills provides an integrated summary of the presentations and discussions from both parts of the third workshop.

Interpersonal Communication, Fourth Edition empowers you to become a more confident communicator by providing you with both the knowledge and the practical skills you need to make effective communication choices in today's rapidly changing and technologically advanced society. Rather than "telling" you how to communicate, authors Richard L. West and Lynn H. Turner offer a toolbox of key skills so you can actively choose and experiment with strategies appropriate for a given situation. Filled with realistic examples and scenarios that reflect the diversity and interactions of today's students, this practical text makes clear connections among theory, skills, and the life situations we all encounter on a daily basis. New to the Fourth Edition: New personal reflection questions for the IPC Careers and IPC Around Us features help you discover the relevance of interpersonal communication in your everyday life. A new applied theory feature, IPC Praxis, shows you how to apply the theories outlined in the chapter narrative to your life experiences. New chapter wrap-ups, key questions for application, and communication application tests provide you with opportunities to assess what you have learned in the chapter. SAGE edge provides you with helpful tools, including eFlashcards, practice quizzes, and more, in one easy-to-use online environment.

Communication Skills Virtual Training offers the crucial tools you'll need to help your workshop participants master the skills that drive performance. Providing your participants with a deeper more nuanced understanding of communication will give them a solid foundation upon which to build strong skills and relationships in the workplace. Derived from the first book in the ATD Workshop series, this edition focuses on delivering virtual training and workshops with practical, road-tested strategies and tactics for use at all levels of your organization. New content geared to virtual training is included in presentation materials, agendas, handouts, assessments, and tools. Communication Skills Virtual Training presents two-day, one-day, and half-day communication training programs, along with relevant chapters on needs analysis, design, delivery, facilitation, and evaluation of the training event.

This books gives insights into your personality, motivation, emotional intelligence, leadership and team skills etc.

Providing a thorough review and synthesis of work on communication skills and skill enhancement, this Handbook serves as a comprehensive and contemporary survey of theory and research on social interaction skills. Editors John O. Greene and Brant R. Burleson have brought together preeminent researchers and writers to contribute to this volume, establishing a foundation on which future study and research will build. The handbook chapters are organized into five major units: general theoretical and methodological issues (models of skill acquisition, methods of skill assessment); fundamental interaction skills (both transfunctional and transcontextual); function-focused skills (informing, persuading, supporting); skills used in management of diverse personal relationships (friendships, romances, marriages); and skills used in varied venues of public and professional life (managing leading, teaching). Distinctive features of this handbook include: * broad, comprehensive treatment of work on social interaction skills and skill acquisition; * up-to-date reviews of research in each area; and * emphasis on empirically supported strategies for developing and enhancing specific skills. Researchers in communication studies, psychology, family studies, business management, and related areas will find this volume a comprehensive, authoritative source on communications skills and their enhancement, and it will be essential reading for scholars and students across the spectrum of disciplines studying social interaction.

YOUR GUIDE TO COLLEGE SUCCESS: STRATEGIES FOR ACHIEVING YOUR GOALS, 7th Edition, supports students as they adjust and learn to thrive in college, providing students with a foundation to become independent learners. The Seventh Edition can be used with any college student--fresh out of high school, returning to the classroom after being in the workforce, native-born or international. The new edition is now organized to reflect the basis of the college success model that has framed previous editions of this textbook. The unique six-part learning model helps students focus on achievable strategies in the following areas: Know Yourself, Clarify Values, Develop Competence, Manage Life, Connect and Communicate, and Build a Bright Future. Revised in terms of both content and design, the Seventh Edition contains new student profiles, expanded career success sections and hundreds of new references to make each chapter more current and satisfying. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Griffin/VanFleet, MANAGEMENT SKILLS: ASSESSMENT AND DEVELOPMENT, 1E, offers a comprehensive, real world approach to mastering the skills needed for a career in management. Because instructors often express the difficulty of creating an active learning environment, this text offers an active, not passive, way for students to learn management skills by challenging students to be self-reflective and asking them to complete numerous assessments, exercises, cases, and other activities. The authors also address another major concern instructors have about students being visual learners by providing a unique Visualize the Skill section not found in any other text. To better enable students to learn about management, chapters are organized in an easy-to-follow format that contains: Assessing Your Skills (pre-assessment scales); Learning About the Skills (concept portion of the text); Practicing Your Skills (exercises); Using Your Skills (case analysis); Extending Your Skills (group and individual exercises); Visualizing the Skills (video exercises); Your Skills Now (assessing skills after working through the chapter); and Interpretations (scoring keys and comparison data). Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Topical listing of tests available to psychologists, educators, and human resource personnel. Intended to describe tests, not to review or evaluate. Entries give such information as test title, author, intended population, mode of administering the test, purpose, features, timing, scoring, cost, availability, and publisher. Miscellaneous indexes.

The Routledge Handbook of Language and Health Communication consists of forty chapters that provide a broad, comprehensive, and systematic overview of the role that linguistics plays within health communication research and its applications. The Handbook is divided into three sections: Individuals' everyday health communication Health professionals' communicative practices Patient-provider communication in interaction Special attention is given to cross-cutting themes, including the role of technology in health communication, narrative, and observations of authentic, naturally-occurring contexts. The chapters are written by international authorities representing a wide range of perspectives and approaches. Building on established work with cutting-edge studies on the changing health communication landscape, this volume will be an essential reference for all those involved in health communication and applied linguistics research and practice.

NOTE: NO FURTHER DISSCOUNT ON THIS PRODUCT TITLE --OVERSTOCK SALE -- Significantly reduced list price Traumatic brain injury (TBI) is a complex condition for which limited research exists. The recent conflicts in Iraq and Afghanistan have resulted in numerous service members returning home after sustaining TBI, and healthcare providers scrambling to find resources on how to treat them. This toolkit is a comprehensive source of inventories and therapy options for treating service members with mild TBI. All aspects of mild TBI are covered, including vestibular disorders, vision impairment, balance issues, posttraumatic headache, temporomandibular dysfunction, cognition, and fitness, among others. With easy-to-follow treatment options and evaluation instruments, this toolkit is a one-stop resource for clinicians and therapists working with patients with mild TBI.
