practice. Around the world, corruption continues to undermine the rule of law and the application of due process rights. Misconduct by criminal justice professionals challenges democratic authority and the equality and freedom of ordinary citizens. There is an urgent need for academics, advocates and policymakers to speak with one voice in articulating universal ethical standards and, most importantly, in prescribing systems and techniques that must be in place for criminal justice to be genuinely accountable and as free from misconduct as possible. The focus of the book is on the core components of the criminal justice system — police, courts and corrections — and the core groups within this system: sworn police officers; judges, prosecutors and defence lawyers; and custodial and community correctional officers. By using quality research and policy analysis of these core components Professor Prenzler formulates a basic checklist that can be used to assess the ethical quality and accountability of the criminal justice system in any jurisdiction.

Introducing the fundamentals of ethical theory, *Ethics in Criminal Justice: In Search of the Truth*, Seventh Edition, exposes the reader to the ways and means of making moral judgments by exploring the teachings of the great philosophers, sources of criminal justice ethics, and ethical issues in the criminal justice system. It is presented from two perspectives: a thematic perspective that addresses ethical principles common to all components of the discipline, and an area-specific perspective that addresses the state of ethics in criminal justice in the fields of policing, corrections, and probation and parole. The seventh edition features discussion of current critical issues in criminal justice: accusations of racism, police shootings, stop and frisk policy, marijuana laws, mass incarceration, life sentences, prison privatization, the swift and certain deterrence model of probation, excessive probation fees, and the Good Lives Model in corrections. The seventh edition also offers completely revised coverage of capital punishment and the rehabilitation debate, and a discussion of how juvenile justice often fails to live up to its ideals. Finally, the book features new case studies of recent ethical dilemmas in criminal justice to enhance students' understanding of real-life ethics decision-making. Suitable for advanced undergraduates or graduate students in criminal justice programs in the US and globally, this text offers a classical view of ethical decision-making and is well-grounded in specific case examples.
