Biomining is the use of microorganisms in the recovery of metals from ores. During bioleaching, metals such as copper, nickel or zinc are oxidized through microbial action from the water-insoluble sulfide to the soluble sulfate forms. Although gold is inert to microbial action, microbes can also be used in gold recovery from certain types of ores because as they oxidize the ore, they open up its structure, thereby allowing a gold-solubilizing agent such as cyanide to penetrate the ore. The book describes several industrial bioleaching and biooxidation processes as well as the underlying theory and biology of the microbes involved.

How Cool Are Penguins is a book that will introduce young children to the world of penguins. It is written and illustrated in a fun and informative way that will entertain both the young and the young at heart.

The Calvary Road is the British evangelist, Roy Hession's best known book. It is a simple practical exposition of the essential role and the fruit of humility and repentance in the Christian life. It has changed lives and ministries. The chapters are: Brokenness; Cups Running Over; The Way of Fellowship; The Highway of Holiness; The Dove and the Lamb; Revival in the Home; The Mote and the Beam; Are You Willing to be a Servant?; The Power of the Blood of the Lamb; and Protesting Our Innocence? Christians of all persuasions appreciate the importance of being filled with the Holy Spirit. The Hessions write "the apostolic injunction, 'Be filled with the Spirit' (Eph. 5. 18) still stands binding on every believer, and he ignores it at the peril of missing the fruitfulness and joy which such fullness brings." This book describes the person of the Holy Spirit and how and why the Christian is to be filled with the Spirit.
