This excellent volume considers the methods, applications and even the foundations of a key area of theoretical study. Namely, that of Bayesian probability, entropy and information theory in scientific and engineering applications. The material here has come out of the so-called MaxEnt workshops that for more than 25 years have explored the subject. Application areas include, but are not limited to: astronomy, physics, chemistry, biology, earth science, and engineering.

OUR CULTURE HAS BECOME OBSESSED WITH HUSTLING. As we struggle to keep up in a knowledge economy that never sleeps, we arm ourselves with life hacks, to-do lists, and an inbox-zero mentality, grasping at anything that will help us work faster, push harder, and produce more. There's just one problem: most of these solutions are making things worse. Creativity isn't produced on an assembly line, and endless hustle is ruining our mental and physical health while subtracting from our creative performance. Productivity and Creativity are not compatible; we are stuck between them, and like the opposite poles of a magnet, they are tearing us apart. When we're told to sleep more, meditate, and slow down, we nod our heads in agreement, yet seem incapable of applying this advice in our own lives. Why do we act against our creative best interests? WE HAVE FORGOTTEN HOW TO FLOAT. The answer lies in our history, culture, and biology. Instead of focusing on how we work, we must understand why we work!why we believe that what we do determines who we are. Hustle and Float explores how our work culture creates contradictions between what we think we want and what we actually need, and points the way to a more humane, more sustainable, and, yes, more creative, way of working and living.

What the book covers: Laptops For Seniors For Dummies, 5th Edition covers basic information for new laptop owners in the seniors demographic who need a gentle, hand-holding, step-by-step approach to getting started. Series features: This bestselling title uses a larger font and large figures to make the book easy to read. The book assumes no prior knowledge and starts with selecting the right laptop or tablet, shows how the various parts connect together, how to use the keyboard and mouse, finding your way around the new Anniversary version of the Windows 10 operating system, using the touchscreen capabilities, using the Internet for shopping, social networking, emailing friends and family, researching, traveling, staying safe online, using files and folders, using office applications, and so on. General layout: Chapter openers present the tasks covered with associated page numbers to help readers find material fast No extraneous elements such as sidebars and text on parts pages Short introductions with standard headings Whats Inside: Chapters include: Buying A Laptop, Setting Up Your Computer, Getting Around Windows 10, Managing Power, Setting Up Your Display, Getting Help with Vision, Hearing and Dexterity Challenges, Setting Up Printers and Scanners, Connecting with Contana, Working with Software Programs, Working with Files and Folders, Working with Windows Apps, Understanding Internet Basics, Hitting the Road with Your Laptop, Browsing the Web, Staying Safe While Online, Keeping in Touch with Mail, Working in the Cloud, Connecting with Other People, Getting Visual: Using the Video, Photos, and Camera Apps, Playing Music in Windows 10, Working with Networks, Protecting Windows, and Maintaining Windows

The papers in this volume were presented at TMRA 2007, the International Conference on Topic Maps Research and Applications, held October 11-12, 2007, in Leipzig, Germany. TMRA 2007 was the third conference in an annual series of international conferences dedicated to Topic Maps in science and industry. The motto of TMRA 2007 was "Scaling Topic Maps." Taken literally the motto implies developing Topic Maps approaches that scale to large data and user volumes. This is a very real and useful research problem which is addressed by many of the contributions to the conference. But there is an even broader interpretation of the motto: wide adoption of Topic Maps in academia and industry. This is an equally important problem, and one that the TMRA conference series exists to help solve. And there is a more fanciful view on the motto. To "scale" can also mean to climb, so for the attendees the conference provided a way to "scale the mountain of Topic Maps." In all these ways TMRA 2007 helped to scale Topic Maps.

This volume contains the proceedings of UIC 2009, the 6th International Conference on Ubiquitous Intelligence and Computing: Building Smart Worlds in Real and Cyber Spaces. The UIC 2009 conference was technically co-sponsored by the IEEE and the IEEE Computer Society Technical Committee on Scalable Computing. The conference was also sponsored by the Australian Centre of Excellence in Information and Communication Technologies (NICTA). UIC 2009 was accompanied by six workshops on a variety of research challenges within the area of ubiquitous intelligence and computing. The conference was held in Brisbane, Australia, July 7-9, 2009. The event was the sixth meeting of this conference series. USW 2005 (First International Workshop on Ubiquitous Smart World), held in March 2005 in Taiwan, was the first event in the series. This event was followed by UISW 2005 (Second International Symposium on Ubiquitous Intelligence and Smart Worlds) held in December 2005 in Japan. Since 2006, the conference has been held annually under the name UIC (International Conference on Ubiquitous Intelligence and Computing). UIC 2006 was held in September 2006 in Wuhan and Three Gorges, China, followed by UIC 2007 held in July 2007 in Hong Kong, and UIC 2008 held in June 2008 in Oslo, Norway. Ubiquitous sensors, computers, networks and information are paving the way toward a smart world in which computational intelligence is distributed throughout the physical environment to provide reliable and relevant services to people.
