needed to effectively run and complete a construction project. Part One offers daily log pages, carefully designed to assist contractors in documenting everything necessary on the jobsite, from daily activities to weather conditions to schedule, deliveries, subcontractors, OSHA requirements, and more. Part Two complements the preceding section by including a variety of resources related to the daily log, including a math/calculations section, an extensive jobsite safety/OSHA requirements section, Spanish/English translations and a comprehensive reference section." -- Publisher's description.

foremen, forewomen, construction site managers. Ideal for keeping everything recorded: Space is left at the top of each page so that it can be clipped onto a clipboard. Designed to work with an Electronic Document Management System (EDMS). Simply give each page a document number, take a photograph and upload it directly. Record all important site related activities: weather, deliveries, work stoppages, safety incidents etc. In case of disputes, you can be sure you have the required information thus minimising claim and litigation risks. As long as you give each page its specific dated project number it can be photographed and then uploaded to a electronic document management system (EDMS). All lines in the log book are dark grey, instead

Peter von Seidlein's Stuttgart Chair for Building Construction and Design, i.e. grid, function, detail, material, and cost, the art of design leads to their integration in a balanced whole. In the second part of the book the author analyzes in detail the application of these parameters in nine case studies from different periods, in different scales and typologies – from furniture to private and public buildings, through to urban design. The book is intended for students as well as for lay people who wish to participate in the public debate on the built environment.

When a jobsite emergency arises, it's the people on the job that are the first responders. This gives those people — the contractors, the construction workers, and anyone else onsite —
