The former chief medical examiner for Rockland County provides a firsthand look inside eleven of his most notorious cases, following the scientific investigative process and the work of the pathologist from the crime scene to the world of high-tech criminal detection.

One of America's leading forensic anthropologists journeys to some of the nation's most infamous crime scenes to describe her work on such cases as the Oklahoma City bombing, the World Trade Center disaster, and the Branch Davidian complex at Waco, Texas, furnishing a vivid glimpse into a key area of criminal investigation. Reprint. 25,000 first printing.

A medical examiner writes about the problems in forensic medicine.

THE TRUE CRIME BOOK OF THE YEAR AND 18-WEEK SUNDAY TIMES TOP 10 BESTSELLER 'One of the most fascinating books I have read in a long time. Engrossing, a haunting

Download Free Dissecting Death Secrets Of A Medical Examiner

page-turner. A book I could not put down' The Times, BOOKS OF THE YEAR _____ Meet the forensic pathologist, Dr Richard Shepherd. He solves the mysteries of unexplained or sudden death. He has performed over 23,000 autopsies, including some of the most high-profile cases of recent times; the Hungerford Massacre, the Princess Diana inquiry, and 9/11. He has faced serial killers, natural disaster, 'perfect murders' and freak accidents. His evidence has put killers behind bars, freed the innocent, and turned open-and-shut cases on their heads. Yet all this has come at a huge personal cost. Unnatural Causes tells the story of not only the cases and bodies that have haunted him the most, but also how to live a life steeped in death. Thoughtful, revealing, chilling and always unputdownable, if you liked All That Remains, War Doctor and This is Going to Hurt you'll love this. **Pre-order Dr Richard Shepherd's new book THE SEVEN AGES OF DEATH now** _____ 'Gripping, grimly fascinating, and I suspect I'll read it at least twice' Evening Standard 'A deeply mesmerising memoir of forensic pathology. Human and fascinating' Nigella Lawson 'An absolutely brilliant book. I really recommend it, I don't often say that but it's fascinating' Jeremy Vine, BBC Radio 2 'Puts the reader at his elbow as he wields the scalpel' Guardian 'Fascinating, gruesome yet engrossing' Richard and Judy, Daily Express 'Fascinating, insightful, candid, compassionate' Observer

The body of a woman floats to the surface of a lake with sixty pounds of cinder block and chain attached to her legs. Her killer faces the death penalty if the prosecution can answer one question: Did she drown? A worker for the only U.S. plant licensed to produce anthrax dies, the victim of a heart attack. But what caused his heart to stop beating? Follow veteran medical examiner Dr. Stephen D. Cohle into the world of forensic pathology, as he solves these and many other cases. Written from an insider's view, Cause of Death puts the reader behind Dr. Cohle's shoulder while he examines each victim. The cases range from exotic murder

mysteries ripe for a CSI episode to everyday casualties of heart attacks and car accidents. Every victim, though, has a story to tell. Enter a real-life morgue with its strange sights, sounds, and smells, and watch a forensic mastermind as he unravels each victim's cause of death. Stephen D. Cohle, MD (Grand Rapids, MI), a nationally recognized figure in the community of forensic medicine, is the chief medical examiner for Kent County, Michigan, and a forensic pathologist for Laboratory Pathologists, PC. He is the author (with R. Byard) of *Sudden Death in Infancy, Childhood, and Adolescence*. Tobin T. Buhk (Grand Rapids, MI) is a high school teacher and freelance writer. In preparation for writing this book, he observed and assisted Dr. Cohle and his forensic team in more than thirty autopsies.

A look inside the world of forensics examines the use of human cadavers in a wide range of endeavors, including research into new surgical procedures, space exploration, and a Tennessee human decay research facility.

During Hurricane Katrina, Dr. Louis Cataldie remained in New Orleans in dangerous and often unbearable conditions to attend to the sick, the injured-and the dead. As chief coroner of Baton Rouge, tending to the dead is Cataldie's job. A little town with big-city problems, Baton Rouge means "Red Stick"-and lives up to its bloody name. Cataldie has faced unusual and disturbing cases, from tracking three serial killers on the loose simultaneously while working the scene of a Malvo/ Muhammad Beltway Sniper shooting, to helping apprehend Baton Rouge serial killer Derrick Todd Lee in a controversial case that was featured in an ABC Primetime Live special with Diane Sawyer and Patricia Cornwell. Cataldie's maverick ways have made him a favorite target of the media, but he offers no apologies, and speaks for those who cannot speak for themselves. Graphic and frank, this is his unique, up-close look at his life spent stalking death in the Deep South.

Have you ever been excited by forensic science or psyched to dig up fossils? This comprehensive guide reveals a whole host of careers in the underrated world of the no-longer-living. Covering everything from well known jobs like archaeologists, morticians, coroners, and forensic scientists to the not-so-well-known professions like studying dead stars and planets to playing a zombie on TV, *So, You Want to Work With the Ancient and Recent Dead?* uncovers a treasure trove of occupational opportunities. In addition to tips and interviews from professionals in the industry, *So, You Want to Work With the Ancient and Recent Dead?* includes inspiring stories from kids who are working toward an exciting career in the area of “dead things” as well as activities, a glossary, and resources to help you unearth your interests and discover a successful career.

A city with eight million people has eight million ways to die. For fifteen years, Shiya Ribowsky worked as a medicolegal investigator in New York City’s medical examiner’s office—the largest, most sophisticated organization of its kind in the world. Utilizing his background in medicine, he led the investigations of more than eight thousand individual deaths, becoming a key figure in some of New York’s most bizarre death cases and eventually taking charge of the largest forensic investigation ever attempted: identifying the dead in the aftermath of the September 11 tragedies. Now, in this mesmerizing book, Ribowsky pulls back the curtain on the New York City’s medical examiner’s office, giving an enthralling, never-before-seen glimpse into death and the city. Born and raised in New York City’s orthodox Jewish community, Ribowsky seems an unlikely candidate for this macabre profession. Nevertheless he has forsaken a promising career of medical work with the living, descending instead into the realm of the dead, enticed by the challenge of confronting death on a daily basis. Taking you through the vermin-infested Bowery flophouses and posh Upper East Side

Download Free Dissecting Death Secrets Of A Medical Examiner

apartments of the city's dead, Ribowsky explores in gruesome detail the skeletons that hang in the Big Apple's closets. Combing through the autopsy room, he also exposes the grim secrets that only a scalpel and a dead body can tell and explains how forensic investigation does not merely solve crimes—it saves lives. But it is in the aftermath of September 11 that the ME's office is handed its biggest challenge: to identify as many of the fallen as possible. With poignant descriptions, Ribowsky provides a dramatic account of the office's diligent and unflappable work with the families of the victims, helping them emerge from the ashes of this tragedy while displaying the strength, grit, intelligence, and compassion that Americans expect from true New Yorkers. At once compelling and heartbreaking, *Dead Center* is a story of New York unlike any other, blending the haunting with the sublime, while painting a striking portrait of death (and life) in the city that never sleeps.

A Hands-On Introduction to Forensic Science, Second Edition continues in the tradition of the first edition taking a wholly unique approach to teaching forensic science. Each chapter begins with a brief, fictional narrative that runs through the entire book; it is a crime fiction narrative that describes the interaction of a veteran homicide detective teamed with a criminalist and the journey they take together to solve a missing persons case. Step-by-step the book progressive reveals pieces of information about the crime, followed by the more traditional presentation of scientific principles and concepts on a given forensic topics. Each chapter concludes with a series of user friendly, cost effective, hands-on lab activities that provide the students the skills necessary to analyze the evidence presented in each chapters. The new edition is completely updated with special focus on new DNA techniques in DNA sequencing, DNA phenotyping, and bioinformatics. Students will engage in solving a missing persons case by documenting the crime scene, analyzing physical evidence in the lab, and presenting findings in a mock trial setting. Within the chapters themselves, students learn

Download Free Dissecting Death Secrets Of A Medical Examiner

about the technical, forensic concepts presented within each of the opening stories segments. The book culminates with having the students playing to role of the main characters in a trial—attorneys, scientific experts, suspect, judge, bailiff, and jury—to present and judge the evidence in a mock trial setting. The mock trial will mimic what takes place in a real courtroom, and the jury of swill be asked to deliberate on the evidence presented to determine the guilt or innocence of the suspect.
