Immer gab es Probleme mit den Druckköpfen! Epson tauschte das Gerät 2 mal auf Garantie komplett aus. Mittlerweile weigert sich Epson das Problem erneut zu beheben. Ich bin leider sehr enttäuscht. On a purely physical basis, the Epson Stylus SX510W, though created in a stylish black finish doesn't offer much in the way of innovation, but as the old saying goes, if it isn't broke, why fix it? The Epson Stylus SX510W is a simple item in design terms but, and this is certainly worth noting, its simplicity is part of its charm.

"It is my feeling that debilitating shame and guilt are at the root of all dysfunctions in families," says Jane Middleton-Moz. A few common characteristics of adults shamed in childhood: You may suffer extreme shyness, embarrassment and feelings of being inferior to others. You don't believe you make mistakes, you believe you are a mistake. You feel controlled from the outside and from within. You feel that normal spontaneous expression is blocked. You may suffer from debilitating guilt; you apologize constantly. You have little sense of emotional boundaries; you feel constantly violated by others; you frequently build false boundaries. If you see yourself in any of these characteristics, you can learn how shame keeps you from being the person you were born to be and how to change that. Shame And Guilt describes how debilitating shame is created and fostered in childhood and how it manifests itself in adulthood and in intimate relationships. Through the use of myths and fairytales to portray different shaming environments, Dr. Middleton-Moz allows you to reach the shamed child within you and to add clarity to what could be difficult concepts. Read Shame and Guilt — you're worth it.

In book 8 of the Colony Ship Eschaton series, Jamie and Michael face the revenge of some old enemies. Not everyone will come out of these encounters alive.

Cine-scapes explores the relationship between urban space, architecture and the moving image. While an impressive amount of research has been done with regards to the way in which architecture is portrayed in film, this book offers a new perspective.... What happens if we begin to see the city as a place for an embodied visual consumption; a visual apparatus or, perhaps, a system that is based on movement, light and the body, and which we can explore in kinematic, kinetic, and kinaesthetic ways? Using film as a lens through which we look at urban spaces and places, Richard Koeck reveals the filmic and cinematic phenomena and spatial qualities that are present in postmodern landscapes, and which are perhaps otherwise disregarded or merely passively consumed. Drawing on the author's extensive knowledge derived from architectural and film practice, Cine-scapes: offers insight into architecture and urban debates through the eyes of a practitioner working in the fields of film and architectural design emphasizes how filmic/cinematic tendencies take place or find their way into urban practices can be used as a tool for educators, students and practitioners in architecture and urban design to communicate and discuss design issues with regard to contemporary architecture and cities Cine-scapes ignites new ways of seeing, thinking and debating the nature of architecture and urban spaces.

Humans have not been able to understand a lot of things. One of these is the human brain itself. The human brain has millions of cells inside it. Each cell has a very specific function. The human mind has immense powers and the harnessing of these powers is in the hands of humans. Complex calculations, body functioning, the synchronized fashion of the human limbs are all in the hands of the brain. Thinking and analyzing is also done by the brain. It has great importance and needs maintenance more than anything else. Yet humans tend to forget this a lot. Training the brain every day is crucial as its performance increases with the exercise it does. The more work it does, the better it performs in the next. A brain can be printed in many ways, but the most important thing that matters in a brain training program is consistency. Keeping the brain healthy is important because of the major functions it performs and also if it doesn't perform well, there could be neurological diseases with age.
