legislation. It is worthy of special research attention because of its high-stakes content (particularly from an individual and a state perspective) and because its development to date has tangentially thrown up some of the most important and contentious constitutional questions in EU law. As the AFSJ becomes more and more intertwined with 'mainstream' EU law, this edited collection provides a timely analysis of the merger between the two. Showcasing a selection of work from key thinkers in this field, the book is organised around the major AFSJ themes of crime, security, border control, civil law cooperation and important 'meta' issues of governance and constitutional law. It also analyses the major constitutional and governance challenges such as variable geometry, institutional dynamics, and interface with rights around data protection/secretcy/spying. In the concluding section of the book the editors consider the extent to which the different facets of the AFSJ can be construed in a coherent and systematic manner within the EU legal system, as well as identifying potential future research agendas. The European Union as an Area of Freedom, Security and Justice will be of great interest to students and scholars of European law and politics.

in 1999 has been cooperation in the fields of policing and criminal justice. Both fields have already been the subject of substantial legislative effort in the EU and an increasing amount of judicial activity in the European Court of Justice. In 2007 - after the Constitutional Treaty of 2004 failed - the new Reform Treaty planned very substantive changes to these policies. Bringing together a wide-ranging set of topics and contributors, this book enables readers to understand these changes by examining three key questions: how did we get to the Reform Treaty; what have been - and still are - the key struggles in competence; and how do the changes fit into the transformation of police and judicial cooperation in criminal matters in the EU?

The EU plays an increasingly important role in issues such as the fight against organised crime and the management of migration flows, transforming the Area of Freedom, Security and Justice (AFSJ) into a priority of the EU's political and legislative agenda. This book investigates whether institutional change - the gradual communitarisation of the AFSJ - has triggered policy change, and in doing so, explores the nature and direction of this policy change. By analysing the role of the EU's institutions in a systematic, theory-informed and comparative way, it provides rich insights into the dynamics of EU decision-making in areas involving high

studies in European Law and civil liberties. Each chapter contains three sections examining: the degree of policy change in the different AFSJ fields, ranging from immigration and counter-terrorism to data protection the role of EU institutions in this process of change a case study determining the mechanisms of change. The book will be of interest to practitioners, students and scholars of European politics and law, EU policy-making, security and migration studies, as well as institutional change.

This book brings together contributions from some of the leading authorities in the field of EU immigration and asylum law to reflect upon developments since the Amsterdam Treaty and, particularly, the Tampere European Council in 1999. At Tampere, Heads of State and Government met to set guidelines for the implementation of the powers and competences introduced by the Amsterdam Treaty and make the development of the Union as an area of freedom, security and justice a reality. Since 1999, a substantial body of law and policy has developed, but the process has been lengthy and the results open to critique. This book presents a series of analyses of and reflections on the major legal instruments and policy themes, with the underlying question, to what extent the ideals held out of 'freedom, security and justice accessible to all', are in fact

reflected in these legislative and policy developments. Has freedom from terrorism and the spectre of illegal or irregular migration, and increasingly strict border securitisation and surveillance overshadowed the freedom of the migrant to seek entry or residence for legitimate touristic, work, study, or family reasons, a secure refuge from persecution, and effective access to justice? In 2004, the Heads of State and Government presented a programme for the next stage of development in these areas, the Hague Programme, and the Directives and Regulations that have been agreed are now being transposed and applied in Member States legal systems. What are the main challenges in the years ahead as the Hague Programme and the existing legislative acquis are implemented?

Since its formation the European Union has expanded beyond all expectations, and this expansion seems set to continue as more countries seek accession and the scope of EU law expands, touching more and more aspects of its citizens' lives. The EU has never been stronger and yet it now appears to be reaching a crisis point, beset on all sides by conflict and challenges to its legitimacy. Nationalist sentiment is on the rise and the Eurozone crisis has had a deep and lasting impact. EU law, always controversial, continues to perplex, not least because it remains difficult to analyse. What is the EU?

An international organization, or a federation? Should its legal concepts be measured against national standards, or another norm? The Oxford Handbook of European Union Law illuminates the richness and complexity of the debates surrounding the law and policies of the EU. Comprising eight sections, it examines how we are to conceptualize EU law; the architecture of EU law; making and administering EU law; the economic constitution and the citizen; regulation of the market place; economic, monetary, and fiscal union; the Area of Freedom, Security, and Justice; and what lies beyond the regulatory state. Each chapter summarizes, analyses, and reflects on the state of play in a given area, and suggests how it is likely to develop in the foreseeable future. Written by an international team of leading commentators, this Oxford Handbook creates a vivid and provocative tapestry of the key issues shaping the laws of the European Union.

The 'Europeanisation' of the fight against crime is a broad and much-contested notion. This in-depth analysis of the role of the EU in fighting crime within the area of freedom, security and justice explores the impact of EU policies in the Member States, the progressive convergence of Member States' criminal law systems, the emergence of mutual recognition as an alternative to harmonization, and the incremental

development of the ECJ's jurisdiction. The essays also explore the limitations inherent in EU counter-crime policies and the changes brought about by the introduction of the Treaty of Lisbon. These changes are discussed both collectively and within individual substantive areas in which the EU has taken an active role in fighting crime, such as corruption, money laundering, terrorism, organised crime and extradition.

This book explores the implications of freedom as a non-domination-oriented view for understanding EU security regulation and its constitutional implications. At a time when the European borders are under pressure and with the refugee and migration crisis, which escalated in 2015, the idea of exploring a constitutional theory for the 'Area of Freedom, Security and Justice' (AFSJ) might seem to be a utopian project. This appears especially true in the light of the increased threat of terrorism in Europe (and on a global scale) and where the expanding EU security agenda is often advanced through the administrative law path, in contrast to the constitutional trajectory. Add to this the prolonged financial crisis, which continues to cast a long shadow on the future development of EU integration, and which suggests that Europe needs to 're-invent itself' beyond the sphere of economics. Therefore, it is precisely because of the current uncertainties regarding the progress

of the EU and the constitutional law project that a constitutional take on the AFSJ is of particular importance. The book investigates the meaning of non-domination and the idea of justice and justification in the area of EU security regulation. In doing so, it focuses on the development of an AFSJ, what it means, and why it represents a fascinating example of contemporary constitutional law with interacting layers of security regulation, human rights law and transnational legal theory at its core.

As the European Union has evolved, it has also begun to address policy questions which are closer to the very heart of the state. From cooperation in Justice and Home Affairs, originally conceived as the third pillar of European cooperation, has emerged the Area of Freedom, Security, and Justice (AFSJ). A unique aspect of policy in this area is the desire to integrate the internal and external dimensions of this policy area. One of the tensions in this policy area has been balancing the protection of fundamental rights and increasing security. The first part of this book focuses on the institutional relations of policymaking in AFSJ, both within member states and between member states, in particular the issues of national executive control, national parliamentary scrutiny and peer review across the member states with regard to AFSJ. The second part focuses on specific policy areas

which are part of AFSJ. Two chapters highlight the tension found in this policy area between security and human or fundamental rights, the first related to data retention and the second on policing external borders. The final two chapters are concerned with data exchange among European countries and transatlantically with the US, and the interface between AFSJ and the Common Foreign and Security Policy (CFSP). The chapters contained in the book were presented at the Dutch Ministry of the Interior and Kingdom Relations and the Dutch national parliament (Tweede Kamer), making it of interest to scholars and practitioners alike.

EU Criminal Justice and the Challenges of Diversity examines how questions of cultural difference between Member States' legal traditions are being constructed, addressed, and resolved in the development of the European Area of Freedom, Security, and Justice. The volume brings together leading socio-legal scholars and criminal justice professors from eight European countries and combines analytical approaches rooted in the social sciences with more normative approaches based on legal doctrine. It examines the construction of a common European criminal policy, explores some of the paths that may be followed by the EU in seeking to cope with national diversity in the field of criminal justice, and finally provides some insights into various forms of
