Competition law is a complex and constantly evolving area of law which affects every aspect of the market economy, including the financial services sector. This book is a comprehensive and practical guide to the application of the EU competition rules to banking and insurance industries. This book is divided into two parts: the first part explores the application of Articles 101, 102 and 107 TFEU to the insurance industry. Emphasis is placed on recent changes which have progressively eroded the block exemption regime that traditionally benefited the insurance industry. In the second part of the book, focus is on the application of the Articles of TFEU to the banking industry, with specific reference to card payment systems, which give rise to some of the most intricate antitrust issues in the financial services sector. Relevant Commission decisions and European Court of Justice case law are discussed and suggestions are made for an alternative regulatory framework through comparative analysis of US regulations. This book will be an invaluable reference point for legal practitioners specialising in EU Competition law, as well as postgraduate students and academic researchers working in competition law and the financial services sector.

The most important book on antitrust ever written. It shows how antitrust suits adversely affect the consumer by encouraging a costly form of protection for inefficient and uncompetitive small businesses.

These proceedings represent the work of contributors to the 10th European Conference on Innovation and Entrepreneurship (ECIE 2015), hosted this year by The University of Genoa, Italy on the 17-18 September 2015. The Conference Chair is Prof Luca Beltrametti and the Programme Co-chairs are Prof Renata Paola Dameri, Prof. Roberto Garelli and Prof. Marina Resta, all from the University of Genoa.

ECIE continues to develop and evolve. Now in its 10th year the key aim remains the opportunity for participants to share ideas and meet the people who hold them. The scope of papers will ensure an interesting two days. The subjects covered illustrate the wide range of topics that fall into this important and growing area of research. The opening keynote presentation is given by Marco Doria – Mayor of Genoa on the topic of Innovation and entrepreneurship in Genoa: past, present and future. A second keynote will be given by Flavia Marzano from the National board for innovation and Italian digital agenda on the topic of Innovation: New visions not just new technologies. The second day Keynote will be given by Roberto Santoro, President of the European Society of Concurrent Engineering Network (ESoCE Net) on the topic of People Olympics for healthy and active living: A people driven social innovation platform. In addition to the main themes of the conference there are a number of specialist mini tracks on topics including Innovation and strategy, Entrepreneurship education in action, The theory and practice of collaboration in entrepreneurship and Challenges for entrepreneurship and innovation in the 21st Century. With an initial submission of 275 abstracts, after the double blind, peer review process there are 88 Academic research papers, 6 PhD research papers, 1 Masters Research paper, 4 work-in-progress papers and 1 Non-academic paper published in these Conference Proceedings. These papers represent research from Australia, Brazil, Bulgaria, Colombia, Croatia, Cyprus, Czech Republic, Denmark, Egypt, Finland, , France, Germany, Ghana, Greece, Hungary, India, Iran, Ireland, Israel, Italy, Japan, Kazakhstan, , Kuwait, Lithuania, Malaysia, Mexico, Netherlands, New Zealand, Nigeria, Norway, Poland, Portugal, Romania, Romania, Russia, Russian Federation, Saudi Arabia, South Africa, Spain, Sweden, Thailand, Thailand, UK and USA

FairEconomy is a concept for a free and fair market economy. In response to the financial and economic crises of the past years, the authors develop fundamental ideas of how a market economy works, what rules markets need and who safeguards fairness and equal opportunity in such an economy. The book sets out the design of a sustainable market order: Going back to the very roots of doing business it offers a fascinating insight into the cultural and anthropological premises of the market economy. Fairness and free competition can be identified as key elements of successful markets, sometimes neglected in politics and business. Legal rules need to ensure that fairness and economic freedom work. The same holds true for the relationship of risk and liability that has been overlooked in the banking sector. The ideas of a FairEconomy, sketched in this book, are fit to become a reality: The authors point to institutions and mechanisms that could integrate the concept into global law. They place their trust less upon ever-larger institutions and more on private entitlement and enforcement at the global, regional, and local levels.

This Handbook provides a comprehensive ten-step model that will help guide development practitioners through the process of designing and building a results-based monitoring and evaluation system.

This Guide to Trade Policy Analysis provides the main tools for the analysis of trade policy. Written by experts with practical experience in the field, this publication outlines the major concepts of trade policy analysis and contains practical guidance on how to apply them to concrete policy questions. The Guide has been developed to contribute to the enhancement of developing countries' capacity to analyse and implement trade policy. It is aimed at government experts engaged in trade negotiations, as well as students and researchers involved in trade-related study or research.
