In this thrilling second book of the Earthborn trilogy, Lucas and Asha have survived the decimation of Earth at the hands of the invading Xalans and seek safe haven with their enemy's true foes, the Sorans. They find a lush planet inhabited by a civilization far more advanced than their own, waging a seemingly endless war against a constantly evolving enemy. The Sorans call the pair of them the “Earthborn” and they're welcomed as heroes, almost as gods. To an audience of billions, they swear an oath to avenge their fallen planet by aiding the Sorans in their war against Xala. But soon Lucas and Asha find Sora just as dangerous as apocalyptic Earth when they're targeted by the Fourth Order, a rebel collective who decries them as false prophets and harbingers of further bloodshed. Their friend and turncoat Xalan scientist Alpha believes he's located someone who can help them turn the tide of the war for good, stranded on a conquered colony planet. But landing on the new world, Lucas and Asha find themselves hunted by a violent, mysterious beast, known only as the Desecrator, let loose by the Xalans. Escaping Earth was only the beginning. As Lucas and Asha quickly learn, the universe has worlds and creatures far more dangerous than anything their home planet could have offered, and their continued survival hinges on gaining new allies they never could have imagined. Set sixteen years after the events of The Exiled Earthborn, this explosive conclusion of the Earthborn trilogy tells the story of two brothers, the sons of Lucas and Asha, tasked with surviving the Xalan war to ensure the continued existence of the human race. Noah, an orphan from Earth's last days who, as a child, was smuggled to safety across the stars, is now nearly a man and a leader to the young enclave of Earthborn who reside on Sora. When the tranquility of their settlement is shattered by a shocking assassination attempt, Noah turns to his combative younger brother Erik, Lucas and Asha's only child by blood, for aid. Their journey takes them to the remnants of a dead planet, an outlaw-infested space station, and back to Sora, whose inhabitants are bracing for a final showdown with the bloodthirsty Xalans. They find themselves facing a new evil: the omnipotent Archon, who is somehow controlling the whole of the Xalan horde, and his bloodthirsty lieutenant, the Black Corsair, who has an unmatched taste for brutality. The Archon, so-called God of the Shadows, has unearthed knowledge that could wipe both Sorans and humans alike from the face of existence. The descendants of the Earthborn must uncover the true nature of the Archon and the Xalans before he burns everything they know and love to ashes. "Don't be alarmed - that dizzy pleasurable sensation you're experiencing is just your brain slowly exploding from all the wild magnificent worldbuilding in Nicky Drayden's Escaping Exodus. I loved these characters and this story, and so will you." - Sam J. Miller, Nebula-Award-winning author of The Art of Starving and Blackfish City The Compton Crook award–winning author of The Prey of Gods and Temper returns with a dazzling stand-alone novel, set in deep space, in which the fate of humanity rests on the slender shoulders of an idealistic and untested young woman—a blend of science fiction, dark humor, and magical realism that will appeal to fans of Charlie Jane Anders, Jeff VanderMeer, and Nnedi Okorafor. Earth is a distant memory. Habitable extrasolar planets are still out of reach. For generations, humanity has been clinging to survival by establishing colonies within enormous vacuum-breathing space beasts and mining their resources to the point of depletion. Rash, dreamy, and unconventional, Seske Kaleigh should be preparing for her future role as clan leader, but her people have just culled their latest beast, and she's eager to find the cause of the violent tremors plaguing their new home. Defying social barriers, Seske teams up with her best friend, a beast worker, and ventures into restricted areas for answers to end the mounting fear and rumors. Instead, they discover grim truths about the price of life in the void. Then, Seske is unexpectedly thrust into the role of clan matriarch, responsible for thousands of lives in a harsh universe where a single mistake can be fatal. Her claim to the throne is challenged by a rival determined to overthrow her and take control—her intelligent, cunning, and confident sister. Seske may not be a born leader like her sister, yet her unorthodox outlook and incorruptible idealism may be what the clan needs to save themselves and their world.

The Earth lies in ruins in the aftermath of an extraterrestrial invasion, the land devastated by a desperate war with no winners between mankind and a race of vicious, intelligent creatures. The seas are drying up while the atmosphere corrodes and slowly cooks any life remaining on the now desolate rock. Food is scarce, trust even more so, and the only people left alive all have done horrific things to stay that way. Among the few survivors is Lucas, an ordinary man hardened by the last few years after the world's end. He's fought off bandits, murderers, and stranded creatures on his long trek across the country in search of his family, the one thing that drives him to outlive his dying planet. What he finds instead is hope, something thought to be lost in the world. There's a ship buried in a crater wall. One of theirs. One that works. To fly it, Lucas must join forces with a traitorous alien scientist and a captured, merciless raider named Asha. But unless they find common ground, all will die, stranded on a ruined Earth. Combining gritty post-apocalyptic survival and epic space opera, The Last Exodus is the beginning of a new action-packed science fiction adventure where the future of the human race depends on its survivors leaving the past behind. Skyhorse Publishing, under our Night Shade and Talos imprints, is proud to publish a broad range of titles for readers interested in science fiction (space opera, time travel, hard SF, alien invasion, near-future dystopia), fantasy (grimdark, sword and sorcery, contemporary urban fantasy, steampunk, alternative history), and horror (zombies, vampires, and the occult and supernatural), and much more. Less than a hundred years from now, the world as we know it no longer exists. Cities have disappeared beneath the sea, technology no longer functions, and human civilization has reverted to a much more primitive state On an isolated northern island, the people of Wing are trying to hold onto their way of life-even as the sea continues to claim precious acres and threatens to claim their very lives. Only fifteen-year-old Mara has the vision and the will to lead her people in search of a new beginning in this harsh, unfamiliar world. This compelling and powerful story set in the near future will hit home with teens, especially those who are ever more aware of the increasingly controversial climate crisis we face in our world today.

Is an unproven, experimental starship the key to finally opening up the cosmos to human exploration? As a mysterious alien race destroys space ships attempting to leave the solar system, humanity's dreams of interstellar travel seem as distant as the next star. With an aggressive and uncommunicative alien power blocking interstellar travel, military and government leaders had accepted that humans would never explore the galaxy. But hope springs forth from the most unlikely of places. Humanity's destiny lies with two inexperienced cadets and the EXODUS Project. Join cadets John Roberts and Julie Olson as they attempt to slip the barricade and free humanity from its oppressors. The exciting first book in the Exodus Series launches a riveting science fiction adventure exploring humanity's boundaries!

The Photurians - a hivemind of sentient AIs and machines - were awakened by humanity as part of a complex political trap. But they broke free, evolved, and now the human race is almost finished. Once we spanned dozens of star systems; now only four remain, and Earth is being evacuated. But the Photos can infect us, and among the thousands rescued from our home world may be enemy agents. Tiny colonies struggle to house the displaced. Our warships are failing. The end of humanity has come. But on a distant planet shielded from both humanity and the Photurians, one hope may still live. The only person who might be able to intervene. The roboteer. He is trapped in a hell of his own making, and does not know he is needed. And so a desperate rescue mission is begun. But can he be reached in time? Or will he be the last remnant of humanity in the universe?

The year is 2095. It has been decades since World War III has ended. The Earth is in severe ecological decline, the result of several centuries of mistreatment by its human progeny. Within a few decades, a century at most, Earth will no longer be habitable. Pollutants, wars, deep mantle mining, and everyday disregard for our planet have finally taken their toll, and now earthquakes, droughts, volcanic eruptions, and plagues are regular occurrences. Colonies have been established on all the larger bodies of the solar system, but these are small and hardly self-sufficient; it is widely recognized that, in order to save the majority of the species, humanity must find a new homeworld, ready-made for its existence."Ian Fydel's 'Breathing Space,' the kick-off novel for his ambitious Exodus Trilogy, is an unexpected SF treasure. . . and a cautionary tale in the most traditional sense. Evocative of the best of James Hogan and Robert Heinlein, this character-driven novel introduces us to a raddled, dying Earth and takes us along on a desperate effort to find a new homeworld for humanity."-Floyd Largent, San Antonio, TXProfessional Writer and Editor"Ian Fydel takes modern day Earth issues (environmental degradation, planetary exploration) and puts it all together in a futuristic, sci-fi thriller ... 'Breathing Space' is a page turning, heart pounding book, that makes you wonder just how close to reality we are on planet Earth now and how soon we may all be looking for a little 'Breathing Space.'"-Edward J.
