An Ammonium Nitrate, Phosphate, Potassium and Sulphur Fertiliser- the perfect product for all- season sillage needs. This True Granular Compound fertilizer supplies high levels of Nitrogen and Potassium with low Phosphate content and the all-important additional Sulphur for enhanced yields and crop quality. Analysis:

Our Range of Fertiliser Products | British Fertilisers ...

Fertiliser is a material added to soil to supply plants with essential nutrients. Fertilisers contain one or more of the three main plant nutrients: nitrogen, phosphorus, or potassium. Each of these nutrients performs a different role: • Nitrogen (N) is needed for healthy leaf growth. • Phosphorus (P) is needed for healthy root and shoot growth.

How to use fertilisers

Whenever possible fertilizer should be stored inside a secure building made from non-combustible materials. The building should be dry, well ventilated and with a floor free of sharp objects. When storing fertiliser inside a building: Stack to a maximum of 3 bags high. Interlock bags in a stack for stability; Keep each stack to a maximum of 300 tonnes.
