Global e-Commerce sales surged to \$29 trillion | UNCTAD

Global Cross-Border B2C E-Commerce Growing at Double-Digit Rates Cross-border B2C E-Commerce is expanding worldwide. It is projected to see accelerating growth rates until 2017 and then decline slightly, while still maintaining double-digit growth figures.

The continued advancement of globalization, increases in internet connectivity, compatibility of international payment systems, and adaptability of logistics and shipping processes have combined to contribute to the rapid growth of the cross-border e-commerce market. Due to these advancements and the ubiquitous presence of smartphones, consumer use of cross-border e-commerce is increasingly simplified, and thus, sellers are hardly restricted to a specific country in terms of promoting, selling, and shipping goods worldwide. The burgeoning opportunities, habits, and trends of shopping on cross-border e-commerce platforms have expedited the prospect of becoming a presence in the global market. This is true for enterprises of all sizes, especially for small? and medium-sized enterprises (SMEs) that want to add their footprint in the international market for the first time. Like any other industry, cross-border e-commerce has its specific economics and driving forces, but has different scopes, challenges, and trends due to the geographic and cultural expanse of relevant environments. Cross-Border E-Commerce Marketing and Management was conceptualized by identifying the scope of new complementary information with a comprehensive understanding of the issues and potential of cross-border e-commerce businesses. The authors believe that this book will not only fill the void in the current research but will also provide far-sighted vision and strategies, as it covers big data, artificial intelligence, IoT, supply chain management, and more. This book provides the necessary knowledge to managers to compete with the competitive market structure and ultimately contribute to the sustainable economic growth of a country. It works as a guideline for existing cross-border e-commerce managers to formulate individual strategies that combine to optimize the industry while keeping the enterprise competitive. This book is useful in both developed and developing country contexts. This publication is an ideal resource for academicians, policy makers, stakeholders, and cross-border e-commerce managers, especially from SMEs.

Electronic commerce (e-commerce) is rapidly transforming the way in which enterprises are interacting among each other as well as with consumers and governments. Despite important potential benefits, businesses and consumers in developing countries were for a long time slow to exploit e-commerce. As a result of changes in the evolving landscape for information and communications technologies (ICTs), this pattern is now changing, and e-commerce is growing rapidly in emerging markets and developing economies. Against this background, this publication revisits the potential opportunities and risks of e-commerce and examines how countries can benefit the most from the phenomenon in today's Information Society. Using official statistics and private sector data, it provides an up-to-date review of global and regional trends related to e-commerce in view of changes in the ICT landscape, focusing on developing countries while drawing lessons from developed countries.

Through a structured literature review and an exploratory factor analysis, this thesis presents a conceptual framework with 6 key factors composed of 19 indicators, including government, consumer, company, product, operation and partnership, which affecting the development of e-logistics in cross-border relation. Then, a comprehensive competitive strategy is generated based on the framework, including government policy, logistics strategy selection, differentiated product, dual-channel inventory and transport. Finally, Walmart and JD.com in China market are chosen as case study, the development of their cross-border e-logistics capacity verify the rationality and applicability of the framework found in this thesis. Durch eine strukturierte Literaturrecherche und eine explorative Faktorenanalyse, stellt diese Arbeit einen konzeptionellen Framework mit 6 Schlüsselfaktoren auf, die sich 19 Indikatoren zusammensetzen, die sich auf die Entwicklung der E-Logistik in Cross-Border-Beziehungen auswirken, darunter Regierung, Verbraucher, Unternehmen, Produkt, Betrieb und Partnerschaft. Anschließend wird eine umfassende Wettbewerbsstrategie auf der Grundlage des Frameworks erstellt, einschließlich der Regierungspolitik, der Auswahl der Logistikstrategie, des differenzierten Produkts, des Dual-Channel-Bestands und des Transports. Schließlich werden Walmart und JD.com im chinesischen Markt als Fallstudie ausgewählt, die Entwicklung ihrer Cross-Border-E-Logistik-Strategie aufgezeigt und Anwendbarkeit des Frameworks demonstrieren.

This publication studies e-commerce-related policies that affect SMEs' engagement in cross-border e-commerce. It identifies the bottlenecks and requirements of e-commerce participation and presents examples of best practices in regulating cross-border e-commerce. This work addresses competitiveness issues in each segment of the cross-border e-commerce process chain, including establishing business online, international e-payment, cross-border delivery and aftersales services. It provides a checklist of the essential ingredients for SME success in cross-border e-commerce, by examining enabling factors at the firm level, immediate business environment level and national policy level. The publication also reviews global cross-border e-commerce and offers a deeper analysis of selected economies. This work serves as a starting point for a public private dialogue on e-commerce, especially for SMEs in developing countries.

This book is an important outcome of the Fifth World Internet Conference. It provides a comprehensive account of the new trends and highlights of global Internet development over the past year, covering network infrastructure, information technology, digital economy, world internet media, cyber security, and international cyberspace governance. This year, the book improves the Global Internet Development Index System and adds more countries into the assessed list, in order to reflect more comprehensively, objectively and accurately the general situation of the world Internet development and thus to provide reference for all countries in promoting Internet development and governance.

This edition of International Trade Outlook for Latin America and the Caribbean covers 2018 and is divided into three chapters. Chapter I analyses the impact of divergent global growth and trade tensions on trade in the region. Chapter II examines the share of Latin America and the Caribbean in global trade in minerals and metals. The region overall is a net exporter in this sector; however, given the typically low level of processing of its exports, it has the largest share in this category of primary products of all regions in the world. Finally, Chapter III examines whether cross-border e-commerce has the potential to galvanize and diversify exports from the region. Cross-border e-commerce refers to transactions for products and services that are ordered online, platform-enabled, or delivered online.

Taxation plays a critical role in promoting sustainable development and developing countries face significant challenges in mobilizing domestic resources. This publication analyses a number of topics which are of particular interest and relevance to developing countries in raising revenues and protecting the tax base. It aims at providing practical assistance to these countries in assessing and addressing the relevant issues in an effective way. Primary audiences are officials of national tax authorities and ministers of finance in developing countries, other professionals dealing with tax matters, the general public, media and universities.

This book advances the international debate on the development of e-commerce with focus on emerging ASEAN economies. It provides readers insights on Asia's needs and efforts to improve the regional legal and economic conditions to support e-commerce. This book looks at the rules and regulations on e-commerce, and e-commerce for inclusiveness growth. It provides insights from several ASEAN member states and discovers the requirements for Asian countries to better grasp the new juncture of growth associated with economic digitalization, which also have deep implications on continuous regional integration and community-building.

The e-commerce market has grown rapidly within the ASEAN region in recent years. This trend is expected to continue in the future given the region's large population base, rising middle-class and improvements in connectivity. This edited volume examines the current state of e-commerce in ASEAN countries. It highlights some of the key domestic and cross-border challenges faced by ASEAN member states in developing e-commerce. These challenges include the regulatory and legal environment in which e-commerce firms operate across ASEAN, and the supporting infrastructure in ASEAN member states. "A comprehensive snapshot of the latest emerging regulatory, policy and consumer issues. It's essential reading for anyone working in this field. E-commerce is fundamentally altering the way in which businesses are being conducted, both within and between ASEAN countries. More than just an alternate distribution channel, online trading offers new opportunities and challenges for consumers, businesses, regulators and policymakers. How do markets operate in the new paradigm? How should regulators and governments ensure that dynamic competitive economies evolve, instead of descending into anti-competitive structures? And how are markets evolving in different parts of Southeast Asia? All of these issues—and much more—are discussed in here. The editors are to be congratulated for assembling a range of insightful perspectives from across ASEAN. These are issues that will affect the region for many years to come. The lessons here are timely and timeless." —Michael Schaper Ph.D., Deputy Chairman, Australian Competition and Consumer Commission, 2008–18

Asia is the world's largest e-commerce marketplace and continues to grow rapidly. Some countries lead. Others need to catch up. An efficient e-commerce marketplace requires information and communication technology infrastructure—including internet access, speed, and affordability—along with logistics, an effective legal and institutional framework, and social acceptance and awareness. This report reviews the opportunities and challenges in developing business-to-consumer e-commerce in the region. It also examines how Fourth Industrial Revolution technologies—blockchains, the internet of things, machine learning, artificial intelligence, and 5G wireless networks, among others—will transform the industry and unlock its dynamic potential. It also offers policy recommendations to help lower barriers to e-commerce development.
