investment management, and options trading. The interviewers use the same questions year-after-year, and here they are with detailed solutions! This edition also includes over 225 non-quantitative actual interview questions, giving a total of more than 450 actual finance job interview questions. There is also a recently revised section on interview technique based on Dr. Crack's experiences interviewing candidates and also based on feedback from interviewers worldwide. The quant questions cover pure quant/logic, financial economics, derivatives, and statistics. They come from all types of interviews (corporate finance, sales and trading, quant research, etc.), and from all levels of interviews (undergraduate, MS, MBA, PhD). The first seven editions of *Heard on the Street* contained an appendix on option pricing. That appendix was carved out as a standalone book many years ago and it is now available in its revised fourth edition: "Basic Black-Scholes" (ISBN: 978-0-9941386-8-2). Dr. Crack did PhD coursework at MIT and Harvard, and graduated with a PhD from MIT. He has won many teaching awards, and has publications in the top academic, practitioner, and teaching journals in finance. He has degrees/diplomas in Mathematics/Statistics, Finance, Financial Economics and Accounting/Finance. Dr. Crack taught at the university level for over 25 years including four years as a front line teaching assistant for MBA students at MIT, and four years teaching undergraduates, MBAs, and PhDs at Indiana University. He has worked as an independent consultant to the New York Stock Exchange and to a foreign government body investigating wrong doing in the financial markets. His most recent practitioner job

The history, mystique, and remarkable success of Goldman Sachs, the world's premier investment bank, are examined in unprecedented depth in this fascinating and authoritative study. Former Goldman Sachs Vice President Lisa Endlich draws on an insider's knowledge and access to all levels of management to bring to life this unique company that has long mystified financial players and pundits. The firm's spectacular ascent is traced in the context of its tenacious grip on its core values. Endlich shows how close client contact, teamwork, focus on long-term profitability rather than short-term opportunism, and the ability to recruit consistently some of the most talented people on Wall Street helped the firm generate a phenomenal \$3 billion in pretax profits in 1997. And she describes in detail the monumental events of 1998 that shook Goldman Sachs and the financial world. Her book documents some of the most stunning accomplishments in modern American finance, as told through the careers of the gifted and insightful men who have led Goldman Sachs. It begins with Marcus Goldman, a German immigrant who in 1869 founded the firm in a lower Manhattan basement. After the turn of the century, we see his son Henry and his son-in-law Sam Sachs develop a full-service bank. Sidney Weinberg, a kid from the streets, was initially hired as an assistant porter and became senior partner in 1930. We watch him as he steers the firm through the aftermath of the Crash and raises the Goldman Sachs name to national prominence. When

he leaves in 1969 the firm has a solid-gold reputation and a first-class list of clients. We see his successor, Gus Levy, a trading wizard and in his day the best-known man on Wall Street, urging greater risk, inventing block trading (which revolutionized the exchanges), and psychologically preparing Goldman Sachs for the complex and perilous financial world that was the 1980s. Endlich shows us how co-CEOs John Whitehead and John Weinberg turned the family firm into a highly professional international organization with a culture that was the envy of Wall Street. She shows as well how Steve Friedman and Robert Rubin brought the firm to the pinnacle of investment banking, increased annual profits from \$900 million to \$2.7 billion, and achieved dominance in most of the businesses in which the firm competes internationally. We see how Goldman Sachs weathered both an insider trading scandal and the fallout from its relationship with Robert Maxwell. We are taken to the present day, as Jon Corzine and Hank Paulson lead the firm out of turmoil to face the most important decision ever placed before the partnership--the question of a public sale. For many years the leadership wrestled with the issue behind closed doors. Now, against the backdrop of unforeseen events, we witness the passionate debate that engulfed the entire partnership. A rare and revealing look inside a great institution--the last private partnership on Wall Street--and inside the financial world at its highest levels.
