For many women in their 20's and 30's, the greatest professional hurdle they'll need to overcome has little to do with their work life. The most focused, confident, and ambitious women can find themselves derailed by a tiny little thing: a new baby. While more workplaces are espousing family-friendly cultures, women are still subject to a "parenting penalty" and high-profile conflicts between parenting and the workplace are all over the news: from the controversy over companies covering the costs of egg-freezing to the debate over parental leave and childcare inspired by Mark Zuckerberg's two-month paternity leave. Here's the Plan offers an inventive and inspiring roadmap for working mothers steering their careers through the parenting years. Author Allyson Downey—founder of weeSpring, the " Yelp for baby products, " and mother of two young children—advises readers on all practical aspects of ladder-climbing while parenting, such as negotiating leave, flex time, and promotions. In the style of #GIRLBOSS or Nice Girls Don't Get the Corner Office, Here's the Plan is the definitive guide for ambitious mothers, written by one working mother to another.

There are often blanket claims that the world is facing more problems than ever but there is a lack of empirical data to show where things have deteriorated or in fact improved. In this book, some of the world's leading economists discuss ten problems that have blighted human development, ranging from malnutrition, education, and climate change, to trade barriers and armed conflicts. Costs of the problems are quantified in percent of GDP, giving readers a unique opportunity to understand the development of each problem over the past century and the likely development into the middle of this century, and to compare the size of the challenges. For example: how bad was air pollution in 1900? How has it deteriorated and what about the future? Did climate change cost more than malnutrition in 2010? This pioneering initiative to provide answers to many of these questions will undoubtedly spark debate amongst a wide readership.

This entertaining book seeks to unravel an array of pricing puzzles from the one captured in the book 's title to why so many prices end with "9" (as in \$2.99 or \$179). Along the way, the author explains how the 9/11 terrorists have, through the effects of their heinous acts on the relative prices of various modes of travel, killed more Americans since 9/11 than they killed that fateful day. He also explains how well-meaning efforts to spur the use of alternative, supposedly environmentally friendly fuels have starved millions of people around the world and given rise to the deforestation of rainforests in Malaysia and Indonesia.
