The truth of the matter is that 95% of the time, people tell you what you want to hear. I wanted to produce something unique and that other women could use to get to know themselves on a deeper level based on my own inner reflections that I know are common to many. This book is like having coffee with your best friend. And hearing things few people have the ability to say. It is easy to read and digest, written in a way that any reader can relate to. It ' s more like having a conversation than reading a book. There is something for everyone who reads it with an open mind. I went through every experience without a partner, but I had my family and friends. I had to teach myself to stop thinking in lack, and start appreciating the things that were present in my life every day. We often overlook the great things about our lives because we fixate on one area. I trained my mind to identify the difference between a need and a want. The person we need to love first, is ourselves because this is the only person we can control. The intentions of this book are to offer a beacon to those who are stumbling around in the dark, trying to find their way. To offer some consolation to other women, because we often go through the same things, so there is no need to beat yourself up. To give some direction to the negative energies most people carry around because they feel obligated to hold on to that pain. Why wait till tomorrow to start being the person you want to be today.

In today's competitive, always-on global marketplace, businesses need to be able to make better decisions more quickly. And they need to be able to change those decisions immediately in order to adapt to this increasingly dynamic business environment. Whether it is a regulatory change in your industry, a new product introduction by a competitor that your organization needs to react to, or a new market opportunity that you want to quickly capture by changing your product pricing. Decisions like these lie at the heart of your organization's key business processes. In this IBM® Redpaper™ publication, we explore the benefits of identifying and documenting decisions within the context of your business processes. We describe a straightforward approach for doing this by using a business process and decision discovery tool called IBM Blueworks Live™, and we apply these techniques to a fictitious example from the auto insurance industry to help you better understand the concepts. This paper was written with a non-technical audience in mind. It is intended to help business users, subject matter experts, business analysts, and business managers get started discovering and documenting the decisions that are key to their company's business operations.

Women instinctively know that men who read are more educated and are better providers. You only have 60 or so productive years. After that you wont be worth much even if your brain is still intact. If you live to age 90 you have 80 times 365 days = 29,200 days so dont waste it. How many days have you wasted so far? Dont you think it is time to pick up a book and read it? I know you have been traumatized, held hostage and brainwashed for twelve to fourteen years by the government mandated compulsory school systems. America is the only place in the world that throws parents in jail if they dont enroll their children in public school.) Its understandable that after graduating high school you probably never want to read another book in your life. However if you want to earn a living for your family and have a better life you are going to have to educate yourself and reading is the only way!
