HVAC Training 101 is a site visited by over 100,000 enthusiasts monthly, who are interested in becoming HVAC technicians. The site initially began as the passion project of a retired HVAC technician. The site quickly gained popularity, building a strong community of aspiring HVAC technicians. Currently, it is managed by a team of ex-HVAC technicians with decades of experience in the industry. Head over to HVACTraining101.Com to learn more. We began by writing about how to become certified as an HVAC technician. With rules and certifications varying for each state, it was a challenging task. We had a few friends in other states help us out, but for some states, we had to dig really deep to find the information needed. Our audience at the time was very happy with the information we provided. At this point, we started getting many questions about EPA 608 certification. Once you get the education and experience needed to become a technician, prospective employers will ask for certification to handle refrigerants. When we started writing about how to become certified, viewers again requested we write a study guide to help them prepare for the 608 exams. The study guides out there were dense and had much more information than was needed to pass the test. This inspired us to embark on a journey to write the simplest study guide for the EPA 608 exam, which would still cover all the necessary information. We hope we have achieved our intended objective. The journey to becoming an HVAC technician can be long and arduous. We congratulate you on taking this path and wish you the best in cracking the EPA 608 exam.

Ace the Major HVAC Licensing Exams! Featuring more than 800 practice questions and answers, HVAC Licensing Study Guide, Second Edition provides everything you need to prepare for and pass the major HVAC licensing exams on the first try. This practical, up-to-date resource is filled with essential calculations, troubleshooting tips for the job site, hundreds of detailed illustrations, and information on current codes and standards. Thoroughly revised to cover the latest equipment and techniques, this career-building guide helps you: Master the material most likely to appear on the ARI, NATE, ICE, RSES, and HVAC licensing exams Improve your test-taking ability with 800+ true-false and multiple-choice questions and answers Learn about the latest refrigerant usage and regulations Keep up with the most recent codes and standards Acquire the confidence, skills, and knowledge needed to pass your exam Covers key HVAC topics, including: Heat sources Heating systems Boilers, burners, and burner systems Piping systems Ductwork sizing Refrigeration equipment and processes Filters and air flow Maintenance, servicing, and safety Humidification, dehumidification, and psychrometrics EPA-refrigerant reclaimers Heating circuits Safety on the job Trade associations and codes
