Organizations are adopting popular management techniques, some scientific, some faddish, often without introducing them properly or adequately measuring the outcome. Enhancing Organizational Performance reviews the most popular current approaches to organizational change--total quality management, reengineering, and downsizing--in terms of how they affect organizations and people, how performance improvements can be measured, and what questions remain to be answered by researchers. The committee explores how theory, doctrine, accepted wisdom, and personal experience have all served as

Mergers, networks, alliances, coalitions--organizations are increasingly turning to new intra- and inter-organizational structures.

Enhancing Organizational Performance discusses how organizations cooperate to maximize outcomes. The committee explores the changing missions of the U.S. Army as a case study that has relevance to any organization. Noting that a musical greeting card contains more computing power than existed in the entire world before 1950, the committee addresses the impact of new technologies on performance. and the role of leadership and organizations in dealing with stress, crisis, and disaster.

Most research into leadership has presented leaders as heroic, charismatic and transformational 'visionaries'. The leader, whether in business, politics or any other field, is the most important factor in determining whether organizations succeed or fail. Indeed, despite the fundamental mistakes which have, arguably, directly led to global economic recession, it is often still taken for granted that transformational leadership is a good thing, and that leaders should have much more power than followers to decide what needs to be done. The Dark Side of Transformational

Leadership confronts this orthodoxy by illustrating how such approaches can encourage narcissism, megalomania and poor decision-making on the part of leaders, at great expense to those organizations they are there to serve. Written in a lively and engaging style, the book uses a number of case studies to illustrate the perils of transformational leadership, from the Jonestown tragedy in 1978 when over 900 people were either murdered or committed suicide at the urging of their leader, to an analysis of how banking executives tried to explain away their role in the 2008 financial crisis This provocative and hugely important book offers a rare critical perspective in the field of

leadership studies. Concluding with a new approach that offers an alternative to the dominant transformational model, *The Dark Side of Transformational Leadership* will be an invaluable text for academics interested in leadership, students on leadership courses requiring a more critical perspective, and anyone concerned with how people lead people, and the lessons we can learn.

MacGregor Burns has spent much of his career documenting the use and misuse of power by leaders throughout history. In this groundbreaking study, Burns examines the qualities that make certain leaders—in America and elsewhere—succeed as transformative figures. Through insightful anecdotes and historical analysis, Burns scrutinizes the charisma, vision, and persuasive power of individuals able to imbue followers with a common sense of purpose, from the founding fathers to FDR, Gandhi to Napoleon. Since its original publication in 1970, *Leadership* has set the standard for scholarship in the field.

experts Edward Lawler and Christopher Worley show how organizations can be “built to change” so they can last and succeed in today’s global economy. Instead of striving to create a highly reliable Swiss watch that consistently produces the same behavior, they argue organizations need to be designed in ways that stimulate and facilitate change. Built to Change focuses on identifying practices and designs that organizations can adopt so that they are able to change. As Lawler and Worley point out, organizations that foster continuous change are closely connected to their environments. Reward experimentation. Learn about new practices and technologies. Commit to

This case book focuses on the leadership style of the key players. The 29 cases were chosen to present all facets of a model of leadership, stating that the most effective leaders are both transformational and transactional in their leadership style. Cases were selected for inclusion and/or developed to provide examples of leaders from across the spectrum of public and private sectors. Specific emphasis was placed on selecting male and female leaders from a broad array of cultures. A great deal has been written about a model of leadership that is referred to as a "full range" of

The book begins with an overview of what constitutes transactional and transformational leadership. This discussion is then expanded to include a Full Range of Leadership Potential™. Discussion of the cases highlight how to build balance in one's leadership profile to optimize the potential of leaders, followers, and their organizations. The presence or absence of styles in a wide variety of contexts will be discussed in terms of the effects on individuals, groups, or organizations. Questions are posed for discussion of each
