In this memoir, Alvin Kernan recalls his life as a student, professor, provost and dean during his career in higher education. He recounts experiences at Columbia, Williams, Oxford, Yale and Princeton against a background of what it was like to work and teach in times of turbulent change.

Plato's Cave

The Allegory of the Cave, or Plato's Cave, was presented by the Greek philosopher Plato in his work Republic (514a–520a) to compare "the effect of education (παιδεία) and the lack of it on our nature". It is written as a dialogue between Plato's brother Glaucon and his mentor Socrates, narrated by the latter. The allegory is presented after the analogy of the sun (508b–509c) and the analogy of the divided line (509d–511e). All three are characterized in relation to dialectic at the end of Books VII and VIII (531d–534e). Plato has Socrates describe a group of people who have lived chained to the wall of a cave all of their lives, facing a blank wall. The people watch shadows projected on the wall from objects passing in front of a fire behind them, and give names to these shadows. The shadows are the prisoners' reality.

Winner of the National Book Critics' Circle Award for Criticism. One of the most highly regarded books of its kind, "On Photography" first appeared in 1977 and is described by its author as " a progress of essays about the meaning and career of photographs." It begins with the famous " In Plato' s Cave" essay, then offers five other prose meditations on this topic, and concludes with a fascinating and far-reaching " Brief Anthology of Quotations."

Shadow Philosophy: Plato's Cave and Cinema is an accessible and exciting new contribution to film-philosophy, which shows that to take film seriously is also to engage with the fundamental questions of philosophy. Nathan Andersen brings Stanley Kubrick's film A Clockwork Orange into philosophical conversation with Plato's Republic, comparing their contributions to themes such as the nature of experience and meaning, the character of justice, the contrast between appearance and reality, the importance of art, and the impact of images. At the heart of the book is a novel account of the analogy between Plato's allegory of the cave and cinema, developed in conjunction with a provocative interpretation of the most powerful image from A Clockwork Orange, in which the lead character is strapped to a chair and forced to watch violent films. Key features of the book include: a comprehensive bibliography of suggested readings on Plato, on film, on philosophy, and on the philosophy of film a list of suggested films that can be explored following the approach in this book, including brief descriptions of each film, and suggestions regarding its philosophical implications a summary of Plato's Republic, book by book, highlighting both dramatic context and subject matter. Offering a close reading of the controversial classic film A Clockwork Orange, and an introductory account of the central themes of the philosophical classic The Republic, this book will be of interest to both scholars and students of philosophy and film, as well as to readers of Plato and fans of Stanley Kubrick.

Cave Blindness Like Plato's cave-dwellers who only saw inaccurate reflections of reality on the wall, America has been blinded to dangerous realities inside and outside our borders, argues award-winning journalist Mort Rosenblum. Our ignorance is not just deplorable, it is literally killing us—and others. Rosenblum—who has reported from more than one hundred countries, many of which he has outlived—explains how we all can and must learn more about what's really happening in the Middle East, Europe, Africa, Asia, Latin America, in matters of war, peace, business, the environment, and education. This cri de coeur by one of our planet's most eloquent journalists is a must-read for anyone concerned about what they don't see in the newspaper or on TV. Escaping Plato's Cave offers both insight and practical ways for Americans to get out of the cave and see what's really going on around us.

A provocative study of the complex relations between philosophy and journalism. The discussion addresses such subjects as the essential nature of journalism, news value, the relation of journalism to education, the ideal of a free press, and practical strategies for press reform and the improvement of journalism.

The Allegory of the Cave, or Plato's Cave, was presented by the Greek philosopher Plato in his work Republic (514a–520a) to compare "the effect of education (παιδεία) and the lack of it on our nature". It is written as a dialogue between Plato's brother Glaucon and his mentor Socrates, narrated by the latter. The allegory is presented after the analogy of the sun (508b–509c) and the analogy of the divided line (509d–511e). All three are characterized in relation to dialectic at the end of Books VII and VIII (531d–534e).Plato has Socrates describe a group of people who have lived chained to the wall of a cave all of their lives, facing a blank wall. The people watch shadows projected on the wall from objects passing in front of a fire behind them, and give names to these shadows. The shadows are the prisoners' reality. Socrates explains how the philosopher is like a prisoner who is freed from the cave and comes to understand that the shadows on the wall are not reality at all, for he can perceive the true form of reality rather than the manufactured reality that is the shadows seen by the prisoners. The inmates of this place do not even desire to leave their prison; for they know no better life. The prisoners manage to break their bonds one day, and discover that their reality was not what they thought it was. They discovered the sun, which Plato uses as an analogy for the fire that man cannot see behind. Like the fire that cast light on the walls of the cave, the human condition is forever bound to the impressions that are received through the senses. Even if these interpretations (or, in Kantian terminology, intuitions) are an absurd misrepresentation of reality, we cannot somehow break free from the bonds of our human condition - we cannot free ourselves from phenomenal state just as the prisoners could not free themselves from their chains. If, however, we were to miraculously escape our bondage, we would find a world that we could not understand - the sun is incomprehensible for someone who has never seen it. In other words, we would encounter another "realm", a place incomprehensible because, theoretically, it is the source of a higher reality than the one we have always known; it is the realm of pure Form, pure fact.Socrates remarks that this allegory can be paired with previous writings, namely the analogy of the sun and the analogy of the divided line.

The definitive sequel to New York Times bestseller How the Scots Invented the Modern World is a magisterial account of how the two greatest thinkers of the ancient world, Plato and Aristotle, laid the foundations of Western culture—and how their rivalry shaped the essential features of our culture down to the present day. Plato came from a wealthy, connected Athenian family and lived a comfortable upper-class lifestyle until he met an odd little man named Socrates, who showed him a new world of ideas and ideals. Socrates taught Plato that a man must use reason to attain wisdom, and that the life of a lover of wisdom, a philosopher, was the pinnacle of achievement. Plato dedicated himself to living that ideal and went on to create a school, his famed Academy, to teach others the path to enlightenment through contemplation. However, the same Academy that spread Plato's teachings also fostered his greatest rival. Born to a family of Greek physicians, Aristotle had learned early on the value of observation and hands-on experience. Rather than rely on pure contemplation, he insisted that the truest path to knowledge is through empirical discovery and exploration of the world around us. Aristotle, Plato's most brilliant pupil, thus settled on a philosophy very different from his instructor's and launched a rivalry with profound effects on Western culture. The two men disagreed on the fundamental purpose of the philosophy. For Plato, the image of the cave summed up man's destined path, emerging from the darkness of material existence to the light of a higher and more spiritual truth. Aristotle thought otherwise. Instead of rising above mundane reality, he insisted, the philosopher's job is to explain how the real world works, and how we can find our place in it. Aristotle set up a school in Athens to rival Plato's Academy: the Lyceum. The competition that ensued between the two schools, and between Plato and Aristotle, set the world on an intellectual adventure that lasted through the Middle Ages and Renaissance and that still continues today. From Martin Luther (who named Aristotle the third great enemy of true religion, after the devil and the Pope) to Karl Marx (whose utopian views rival Plato's), heroes and villains of history have been inspired and incensed by these two master philosophers—but never outside their influence. Accessible, riveting, and eloquently written, The Cave and the Light provides a stunning new perspective on the Western world, certain to open eyes and stir debate. Praise for The Cave and the Light "A sweeping intellectual history viewed through two ancient Greek lenses . . . breezy and enthusiastic but resting on a sturdy rock of research."—Kirkus Reviews "Examining mathematics, politics, theology, and architecture, the book demonstrates the continuing relevance of the ancient world."—Publishers Weekly "A fabulous way to understand over two millennia of history, all in one book."—Library Journal "Entertaining and often illuminating."—The Wall Street Journal

MartinHeidegger is one of thetwentieth century's most important philosophers, renowned for his explorationof "the question of being". He was Professor of Philosophy at the Universitiesof Marburg and Freiburg and his influence is felt in such diverse subjects asphilosophy, theology, literary theory and artificial intelligence. The Essence of Truth is an examination of the most fundamental themein Heidegger's philosophy: the difference between truth as 'the unhiddenness ofbeings' and truth as 'the correctness of propositions'. Based on a courseof lectures delivered at the University of Freiburg in 1932, the book presents Heidegger's original analysis of Plato's philosophy and represents an important discussion of a fundamental subject of philosophy through the ages.
