Industrial heritage as tourism resource has not been on the everyday " agenda " for the tourism developers in Latvia and Estonia. Developing the common network of industrial heritage sites in Latvia and Estonia and combining the sites into the tourism route, would allow increase competitiveness of destinations, diversify tourism offer and attract more visitors.

### About Industrial Heritage for Tourism

Europe is a key cultural tourism destination thanks to an incomparable cultural heritage that includes museums, theatres, archaeological sites, historical cities, industrial sites as well as music and gastronomy. It is estimated that cultural tourism accounts for 40% of all European tourism. 4 out of 10 tourists choose their destination based on its cultural offering. The EU promotes a balanced approach between the needs to boost growth on one side, and the preservation of artefacts, historical ...

### Cultural tourism – European Commission

Heritage tourism involves visiting historical or industrial sites that may include old canals, railways, battlegrounds, military sites, etc. The overall purpose is to gain an appreciation of the past. It also refers to the marketing of a location to members of a diaspora who have distant family roots there.

### Heritage tourism – Wikipedia

In 2014, one in 10 enterprises in the European non-financial business economy belonged to the tourism industries. In 2018, the 'travel and tourism' sector directly contributed 3.9% to EU GDP and accounted for 5.1% of the total labour force (which equates to some 11.9 million jobs).

### Tourism | Fact Sheets on the European Union | European ...

This book examines the complex interplay between industrial heritage and tourism. It serves to stimulate meaningful dialogue about the socioeconomic values of industrial sites and the use of tourism for the growth of the creative economy, and to better understand how the collective social memory and local identity connected to these sites have been shaped by different social groups over time. The volume presents a conceptual framework underpinned by case studies drawn from Asia, North America, Australasia and Europe and advocates the creation of mixed-use spaces and stakeholder collaboration to develop tourism at industrial heritage sites. These theoretical and practical perspectives will be of use to researchers and students of heritage tourism, urban and regional planning and tourism marketing.

"This report provides a description and analysis of how, why, when and where industrial heritage based tourism and rural tourism have developed in Europe. It discusses current issues in those subjects and suggests ways in which both activities could be expanded, made more viable and sustainable, and so deliver greater economic, environmental and socio-cultural benefits for the local communities involved and for Europe as a whole."--Editor.

This book examines the complex interplay between industrial heritage and tourism. It serves to stimulate meaningful dialogue about the socioeconomic values of industrial sites and the use of tourism for the growth of the creative economy, and to better understand how the collective social memory and local identity connected to these sites have been shaped by different social groups over time. The volume presents a conceptual framework underpinned by case studies drawn from Asia, North America, Australasia and Europe and advocates the creation of mixed-use spaces and stakeholder collaboration to develop tourism at industrial heritage sites. These theoretical and practical perspectives will be of use to researchers and students of heritage tourism, urban and regional planning and tourism marketing.

The single market and trade policy are Europe's major economic achievements and its best assets in times of increasing globalisation. European integration, as well as any other regional integration, is impossible without these two policies, which are a good example of how to implement a positive form of globalisation. They represent an engine for growth and building a more competitive EU economy. The single market and trade policy, by allowing people, goods, services and capital to move more freely through both Member States and the world, open up new opportunities for citizens, workers, businesses and consumers, creating the jobs and growth Europe so urgently needs. This collection of essays addresses the various facets of these two pillars of European integration. A more efficient single market creates the conditions for a more open trade policy, and vice-versa. Growth has been lacking in Europe in recent years, and enhancing these two assets is the most fruitful way to find it again.

Because few comparative data existed on European cultural tourism, when the European commission designated cultural tourism as a key

area of tourism development in Europe, the European association for tourism and leisure education undertook a transnational study of European cultural tourism. The first five chapters address general themes (the scope and significance, the social context, the economic context and the political context of cultural tourism). The are followed by eleven chapters on individual countries from the European Union. Re-issued in 2005 in electronic format by ATLAS, the Association for Tourism and Leisure Education.

With an expected growth rate of around 6 per cent rural tourism is developing faster than the overall growth rate for international tourism arrivals. Due to its special importance for the European region, three seminars were held in Belgrade (Serbia), Kielce (Poland) and Yaremcha (Ukraine) to focus on three major issues: to contribute to a better understanding of rural tourism and to offer additional tools for planning and execution of initiatives; to enhance the importance of rural tourism in the agendas of governments and international organizations; to generate political and financial support for the development of rural tourism. (WTO)

This book examines the sugar and tourism relationship in the context of globalization by identifying destination transitions from sugar to tourism. It profiles the role of sugar in colonization, enslavement, decolonization and postcolonial tourism, offering examples of sugar heritage in tourism from Europe, the Caribbean, South America, Asia and North America.

This volume comprises the authoritative work from the International Committee for the Conservation of the Industrial Heritage – the international group dedicated to industrial archaeology and heritage – detailing the latest approaches to the conservation of the global industrial heritage. With contributions from over thirty specialists in archaeology and industrial heritage, Industrial Heritage Re-tooled establishes the first set of comprehensive best practices for the management, conservation, and interpretation of historical industrial sites. This book:-defines the meaning and scope of industrial heritage within an international context;-addresses the identification and conservation of the material remains of industry;-covers subjects as diverse as documentation and recording of industrial heritage, industrial tourism, and the teaching of industrial heritage in museums, schools, and universities.

Today, it is considered good business practice for tourism industries to support their micro and macro environment by means of strategic perspectives. This is necessary because we cannot contemplate companies existing without their environment. If companies do not involve themselves in such undertakings, they are in danger of isolating themselves from the shareholder. That, in turn, creates a problem for mobilizing new ideas and receiving feedback from their environment. In this respect, the contributions of academics from international level together with the private sector and business managers are eagerly awaited on topics and sub-topics within Strategies for Tourism Industry - Micro and Macro Perspectives.
