An official publication of the Association for Professionals in Infection Control and Epidemiology, Inc. (APIC), the highly successful Infection Control in Home Care and Hospice helps home care providers assess the infection control needs of their organization, and develop home care infection and surveillance programs. The Second Edition has been thoroughly updated and revised with the latest CDC Guidelines on infection control in home care, including Hand Hygiene, Prevention of IV-related Infections, and the 2004 Isolation Guideline.

Dr. Kaye and Dr. Dhor have assembled top experts to write about facility planning and management in Part I of their two issues devoted to Infection Prevention and Control in Healthcare. Articles in this issue are devoted to: Building a Successful Infection Control Program: Key Components, Processes and Economics; Hand Hygiene Sterilization; High Level Disinfection and Environmental Cleaning; Environment of Care; Infection Control in Alternative Healthcare Settings (Long Term Care and Ambulatory); Antibiotic Stewardship; Outbreak Investigations Water Safety in Healthcare/Legionella in the Healthcare Setting; Construction and Renovation; Bloodborne and Body Fluid Exposures - prevention and management of Occupational Health Issues; and Informatics and Statistics in Infection Control. Part II is devoted to clinical management of infections.

This comprehensive text addresses the issues of controlling the spread of disease agents and maintaining safety in the dental office. It emphasizes the basic concepts of infectious disease and the actual practice of infection control, and describes the specific procedures used and the supplies and equipment needed for disease prevention and office safety. Written at a level appropriate for the entire dental team, the book reflects the new legislation passed for the protection of dental patients and dental workers, and shows how these mandates have changed the way dental care is provided. Logical organization of topics allows better comprehension and enhanced readability. The inclusion of tables, boxes, and illustrations helps to reinforce important information. Microbiology and other basic topics are covered, with descriptions of bacteria, viruses, and fungi, and the development of infectious diseases, oral microbial diseases, and bloodborne disease agents. Bloodborne pathogens are discussed, including hepatitis, HIV, and tuberculosis. The text addresses how diseases are spread, and how the spread of disease can be prevented. Detailed information is provided on office management, including the office safety program, how to manage chemicals, and how to prepare and implement a fire/emergency action plan. Content has been updated to reflect new laws, regulations and procedures. Two completely new chapters have been added: About the Occupational Safety and Health Administration (OSHA), and Infection control concerns during remodeling/construction. More "step-by-step" procedure boxes are featured, giving detailed instructions on how to perform procedures such as instrument processing, following up on a sterilization failure, and the use of surface covers. Appendix C, CDC guidelines for infection control in dental health care settings 2003, reflects the most up-to-date information available. Added is Appendix G, on the Health Insurance Portability and Accountability Act (HIPAA) of 1996. Review questions are added at the end of each chapter, with answers in the back of the book. A detailed outline is now included at the beginning of each chapter. Key terms are included at the beginning of each chapter, and bolded upon first mention. New illustrations and a two-color design have been added.
