Written by Dr Sandi Mann, Senior Lecturer at the University of Central Lancashire, Psychology: A Complete Introduction is designed to give you everything you need to succeed, all in one place. It covers the key areas that students are expected to be confident in, outlining the basics in clear jargon-free English, and then providing added-value features like summaries of key experiments, and even lists of questions you might be asked in your seminar or exam. There's Bart, his stepson, who is forced to hide out in a monastery to avoid being found by the stepfather's private detective. Bart has own personal problem, which is trying to say the difficult four-letter word, "love." There's Carol, Bart's older sister, who thinks she may have found Mr. Right, but Mr. Right is ready for some loving but not any kind of commitment. There's Tony Koole, a gangster, who is hot on the trail of Bart's girlfriend, whom he suspects stole his brief case containing cocaine worth two million dollars. There's Abbot Aloysius, a kind gentle monk, who doesn't have any idea someone may be growing marijuana in the monastery's huge forest. Finally after a dozen twists and turns, there is a surprise ending.

"This book is designed to help students organize their thinking about psychology at a conceptual level. The focus on behaviour and empiricism has produced a text that is better organized, has fewer chapters, and is somewhat shorter than many of the leading books. The beginning of each section includes learning objectives; throughout the body of each section are key terms in bold followed by their definitions in italics; key takeaways, and exercises and critical thinking activities end each section"--BCcampus website.
