The Temple Elephant is a novel meant for all those with a young heart, a vivid imagination and a thirst for divine love. Narrated from the viewpoint of an elephant, it may be called a bestiary with a socio-political and spiritual message. The novel opens with an eloquent description of an ancient South Indian temple in which the aged elephant, Kesavan, is serving God. As he ambles along the streets of a temple town

with the silver image of Krishna on his back, Kesavan recalls the events of his past life. His turbulent youth and manhood in the jungle, his capture in a keddah operation, his sufferings at the hands of his tormentors, his revenge, and finally his willing submission to the Maharishi, his guru, who not only saves him from slavery and death, but also shows him a path of love and self-surrender that eventually brings him to serve in an ancient temple. Set against the backdrop of the British Raj, the novel takes its readers on an odyssey from the beautiful jungles of South India through the opulence of palace life to the serene simplicity of an ashram.

Pytel/Kiusalaas' ENGINEERING MECHANICS: DYNAMICS, 4E. This edition clearly introduces critical concepts using learning features that connect real problems and examples with the fundamentals of engineering mechanics. Readers learn how to effectively analyze problems before substituting numbers into formulas. This skill prepares readers to encounter real life problems that do not always fit into standard formulas. The book begins with the analysis of particle dynamics, before considering the motion of rigid-bodies. The book discusses in detail the three fundamental methods of problem solution: force-mass-acceleration, work-energy, and impulse-momentum, including the use of numerical methods. This volume is a festschrift for Katherine Nelson, an NYU professor who was a pioneer in infant perception and memory. The "mediated mind" is a term coined by Dr. Nelson and it refers to how cognitive development is mediated by the sociocultural context, including language and social interaction. The impact of Nelson's views on the sociocultural basis of cognition and her functionalist perspective on cognitive development are evident in the collection of chapters in this book. The contributors--all leaders in the field of cognitive development--examine ways in which cognition is

embedded in everyday, meaningful activities and the role of social context and cultural symbol symptoms, such as language and text influence children's developing concepts and thought. The concept of the mediated mind is examined from a variety of perspectives, including research in concept development, memory development, language learning, the development of literacy, narrative analysis, and children's theory of mind. The significant contribution of this volume is that it addresses all aspects of the mediated mind.

Memory--both autobiographical and event-semantic--theory of mind, mental representation, temporality, narrative, and metalinguistic awareness comprise the chapter topics. The breadth of topics represented is a tribute to the impact Nelson's vision has on many developmental "domains." The

contributors acknowledge and honor her work. Her theory and research paved the way for the advances in understanding a mediated mind that are evident and that will continue to shape notions of how the human mind develops and evolves within a social, interactive world.

Learn a broad range of techniques for dry flies, streamers, and wet flies by tying the modern flies that everyone is talking about. Author Tim Cammisa teaches you how to tie these simple but effective patterns and then how to take the techniques you've learned and use them for most of the other core patterns—old and new—that should be in your box. Includes information on the latest materials, tying tips from other tiers, and 16 patterns with recipes and complete step-by-

This is a concise presentation of the concepts underlying the design of digital communication systems, without the detail that can overwhelm students. Many examples, from the basic to the cutting-edge, show how the theory is used in the design of modern systems and the relevance of this theory will motivate students. The theory is supported by practical algorithms so that the student can perform computations and simulations. Leading edge topics in coding and wireless communication make this an ideal text for students taking just one course on the subject. Fundamentals of Digital Communications has coverage of turbo and LDPC codes in sufficient detail and clarity to enable hands-on implementation

With three months remaining of her marriage of convenience, Savannah is ready to say goodbye to her spoiled rich boy of a husband. He's annoying and argumentative and used to always getting his way. Sure, he's hot. And maybe occasionally a little bit sweet. But she doesn't want to stay married to him. Not at all. He needed a wife for a year so he could inherit his grandmother's fortune, and she needed to pay off her family's debts. That's all their marriage has ever been about. So she really needs to stop falling into bed with him.

Embracing Forgiveness is a five-session small group church study for adults and young adults incorporating a Participant Workbook and a DVD. This eBook is of the Participant Workbook with the corresponding Small Group DVD available separately. The Participant Workbook is available in this eBook format as well as in print format. In the small group using Embracing Forgiveness, each participant uses his/her own Workbook for study and reflection. Embracing Forgiveness is part of the Embracing Series of small group studies, each led by a popular author, speaker, and teacher. Each program in this series includes a Small Group DVD and a Participant Workbook, each sold separately. Each DVD segment includes a 10-15 minute presentation by the leader,

then a 10-15 filmed interaction with a small group of adults, discussing the presentation. In this study, author and teacher Barbara Cawthorne Crafton shares stories and insights on forgiveness, what it is and isn't, why it's so badly needed, and how employing simple, concrete practices can integrate forgiveness into our lives. Session titles are: 1. Seventy Times Seven: Really? 2. You Have Heard it Said 3. Chipping Away 4. How to Start 5. Why Forgive?
