Industrial Relations in Canada provides students with an insightful look into the relationships between labour, management, and government agencies. By balancing theory and research with practical, real world examples, students learn about the complex and dynamic world of industrial relations. The Person provides psychologists with an organizational scheme for personality psychology. This sets the study of the person into evolutionary and cultural context and divided personality up into three broad areas: dispositional traits, characteristic adaptations, and integrative life stories. The fifth

edition has been updated to reflect advances that have occurred in the field of psychology in the past few years. It presents new findings that have been obtained with respect to the correlates of personality traits, the dynamics of motives and goals in human lives, and the meanings and manifestations of life stories. Discussions are included on the new ideas on evolution and morality as well as the role of culture in personality. Psychologists will also find a much stronger and detailed discussion of psychophysiology of extraversion, neuroticism, and the train of sensation-seeking.
