Classical Electrodynamics captures Schwinger's inimitable lecturing style, in which everything flows inexorably from what has gone before. Novel elements of the approach include the immediate inference of Maxwell's equations from Coulomb's law and (Galilean) relativity, the use of action and stationary principles, the central role of Green's functions both in statics and dynamics, and, throughout, the integration of mathematics and physics. Thus, physical problems in electrostatics are used to develop the properties of Bessel functions and spherical harmonics. The latter portion of the book is devoted to radiation, with rather complete treatments of synchrotron radiation and diffraction, and the formulation of the mode decomposition for waveguides and scattering. Consequently, the book provides the student with a thorough grounding in electrodynamics in particular, and in classical field theory in general, subjects with enormous practical applications, and which are essential prerequisites for the study of quantum field theory. An essential resource for both physicists and their students, the book includes a 'Reader's Guide,' which describes the major themes in each chapter, suggests a possible path through the book, and identifies topics for inclusion in, and exclusion from, a given course, depending on the instructor's preference. Carefully constructed problems complement the material of the text, and introduce new topics. The book should be of great value to all physicists, from first-year graduate students to senior researchers, and to all those interested in electrodynamics, field theory, and mathematical physics. The text for the graduate classical electrodynamics course was left unfinished upon Julian Schwinger's death in 1994, but was completed by his coauthors, who have brilliantly recreated the excitement of Schwinger's novel approach.

Captain Griffin Hawke has searched for his lost king and lover, Helios, for a decade, only to find him in the shackles of a whore with no memory of the past. Their people desperately need a leader, but Helios's return will draw dangerous enemies.

LOOKING FOR TROUBLE: Mark Dalton isn't sure if he finds trouble or if trouble finds him. But ever since his wife traded him in for a prettier model, and he traded in his Private Eye business for a Peterbilt, it seems to be everywhere he goes. In this collection of loosely interwoven who-dunnits, Edo van Belkom introduces Mark Dalton, Trucker Detective. Whether he's scooping up pretty hitchhikers with secrets, getting back goods stolen right out from under his nose, making a shady repair shop pay, or solving a racially charged, post-9/11 murder, Dalton is one busy trucker. And truth is, he wouldn't have it any other way.

The supply of organs for people that need them through organ donation is not enough to satisfy the demand. Some people go to foreign countries like Poland, Thailand or India to buy an organ. Some organs can only be donated from a deceased person. Others come from living people like kidneys and bone marrow. Some day, all organs will be synthetic but not yet. This is a simple guide about organ donation-transplantation. Organ transplant is the process of replacing diseased organs with healthy ones. After that, the patient must take anti-reaction drugs for life. You can donate a few organs and still keep the body intact for a funeral or you can donate the body completely. You receive no pay although some places now are buying people's bodies in advance for when they die.

Returning to his small Texas hometown, a writer delves into an investigation of an unsolved arson in the form of a cotton fire 25 years earlier that split the community and turned family members against each other. Original.

Nick is a bored, thirty-something art teacher, with a long backlist of doomed romances. Wendy is an aspiring young artist, whose family life is killing her. Nick and Wendy meet and fall in love, and their world starts to spin out of control. They keep on the move. In London they explore the limits of their bodies. In Bath they seal old wounds. In Leicester they ditch normality, throwing themselves into a summer that will stain them forever. As relationships blend and friendships strain, they travel through obscure towns to the mountains of Skye, driven on by the man who pursues them.
