Intermediate Macroeconomics. This text is the most even-handed and comprehensive treatment of the competing classical and Keynesian approaches in the market. By starting with topics on which the two approaches agree, the book highlights the common ground between them and then clearly presents the outstanding differences within the context of a single framework. Macroeconomics now includes a password that gives students access to a special edition of The Conference Board's Business Cycle Indicators database containing over 100 hand-picked data series. Accompanying exercises in the text provide a unique opportunity for students to analyze the very data that policy makers, professional economists, and government officials rely on in their day-to-day work. *NEW! Earlier presentation of business cycles. *NEW! Included are new EOC problems (including the Conference Board exercises), many new applications, and new built-in Web links. *NEW! Web site features, including: *Up-to-date version of The Conference Board's Business Cycle Indicators, which students can access to complete the new Conference Board problems at the end of the text chapters. *Sample worked problems. * Self-test quizzes

Students often struggle to see how macroeconomic models compare to one another and fit into the big picture. Using a unified approach based on a single economics model, Abel, Bernanke, and Croushore provide a balanced, comprehensive treatment of classical and Keynesian economics, presenting macroeconomic theory in a way that prepares students to analyze real macroeconomic data. The Sixth Edition Update consists of the Sixth Edition of Macroeconomics and the 2008-2009 Update Booklet, which is correlated to sixteen key chapter topics with resource material including speeches, reports, or testimony, most from the Federal Reserve Board.
