This book is the first English-language edition of a collection of writings by one of Italy's most important radical liberals, Piero Gobetti (1901-1926). In thirty-five thought-provoking essays, Gobetti proposes an original and challenging notion of liberalism as a revolutionary theory of both the individual and social and political movements. His theory is of particular

relevance in the wake of the collapse of Marxist socialism, as non-Western countries with nonliberal or antiliberal cultural and moral traditions confront the problems of transition toward democracy and liberalism. Gobetti's ideas continue to influence in important ways today's heated debates over the nature of liberalism. Gobetti was the first Italian scholar to identify "two Italys": one enlightened and modern though small and weak, the other premodern, traditional, and dominant. A witness to the seizure of power by the Fascists, Gobetti became convinced that Italy's hostility to

liberalism could be overcome only with a cultural revolution. Endorsing a radical liberalism, he nevertheless believed that the Communists, led by Antonio Gramsci, could play a crucial role in democratizing Italy by helping to develop a secular culture. For a liberal state to subsist and grow, Gobetti argued, there must first be a transformation of both the economic structure and the legal and moral culture of the society.

Written by a leading proponent of biophilic design, this is the only practical guide to biophilic design principles for interior designers. Describing the key benefits, principles and processes of biophilic design, Nature Inside illustrates the implementation of biophilic design in interior design practice, across a range of international case studies - at different scales, and

different typologies. Starting with the principles of biophilic design, and the principles and processes in practice, the book then showcases a variety of interior spaces - residential, retail, workplace, hospitality, education, healthcare and manufacturing. The final chapter looks 'outside the walls', giving a case study at the campus and city scale. With practical guidance and real-world solutions that can be directly-applied in day-to-day practice, this is a must-have for designers interested in applying biophilic principles.

The Thing about Roy Fisher is the first
critical book to be dedicated to the work of
this outstanding poet, who has won many
admirers for his explorations of the modern
city, his experiments with perception and
sensory experience, his jazz-inspired prose,

and his political and cultural comedies. The collection brings together a distinguished group of contributors : poets and critics, from several generations, active on both sides of the Atlantic. In a dozen newly commissioned essays they discuss the entire range of Roy Fisher's work, from its fraught beginnings in the 1950s through such major texts of the 1960s and 1970s as *City*, *The Ship's Orchestra* and *Wonders of Obligation*, to *A Furnace*, his 1980s masterpiece, and beyond. The essays are closely engaged with the fabric of Fisher's verse, but they also bring into view a fascinating array of

connections between contemporary poetry and philosophy, psychology; the visual arts and jazz. The Thing about Roy Fisher ends with a full and up-to-date bibliography; an essential starting point for further study of this versatile and complex writer, whose centrality and importance within modern English and European poetry is now more than ever apparent. Kerrigan and Robinson's collection provides a helpful introduction to Roy Fisher's work, and will be necessary reading for anyone with a live interest in modern poetry.

We live in a time of instant gratification, where we have forgotten to consider the long-term consequences of our actions. Whether it's decision about our health, our finances or our jobs, we lack the tools we need to choose what's best for the future. In *The Optimist's Telescope*, journalist and advisor in the Obama administration Bina Venkataraman draws on her own experience to highlight the surprising and successful practices that each of us can adopt to make smarter, more thoughtful choices that benefit us over time.
