An exclusive look at one of the world's most successful and controversial companies, and the mysterious family behind it. BMW is arguably the most admired carmaker in the world. It's financial performance is the envy of its competitors, and BMW products inspire near-fanatical loyalty. While many carmakers struggle with falling sales, profits and market share, demand for BMWs continues to grow, frequently outpacing production. Now, David Kiley-Detroit Bureau Chief at USA Today and author of *Getting the Bugs Out*, which covered Volkswagen's demise and rebirth, goes inside the fabled German automaker to see how it does what it does so well. With unprecedented access to BMW executives, Kiley goes behind the walls of BMW's famed "Four Cylinders" headquarters in Munich at a time when the company is in its most aggressive, and some say riskiest, expansion in its history and when some of the company's new products, like the 7 Series sedan and Z4 roadster, are for the first time drawing as many barbs from critics as bouquets. Kiley covers intimate details of the boardroom drama surrounding the company's nearly disastrous acquisition and subsequent sale of the British Rover Group and its expansion into selling MINI and Rolls Royce cars. Besides being a world-class carmaker, BMW is also considered one of the smartest consumer marketing companies and Kiley explores the extraordinary value and management of the BMW brand mystique. He also takes a revealing look at the mysterious and ultra-private Quandt family of Bad Homburg Germany, which owns a controlling stake in BMW: Johanna and Susanne Quandt, two of the wealthiest women in Europe and Stefan Quandt, one of the wealthiest bachelors on the continent. David Kiley (Ann Arbor, MI) is the Detroit Bureau Chief at USA Today who has covered the auto industry for 17 years. He has been featured on Nightline, CNBC, CNN, MSNBC, NPR and the Today show. He is also the author of *Getting the Bugs Out: The Rise, Fall, and Comeback of Volkswagen in America* (0-471-26304-4), also available from Wiley.

The RVer's Bible is the ultimate guide to living and traveling in a recreational vehicle. From purchasing, maintaining, and driving the rig to navigating the emotional pitfalls of life on the road, this handbook covers all the bases. Now revised and updated, the RVer's Bible keeps you up-to-date with all the new technologies and systems of the 21st century RV.

Krause Publications' Standard Catalog series is available by specific marque, in individual volumes or a set. Each book contains in-depth profiles of specific makes by model, factory photos, and up-to-date vehicle pricing. The I-to-conditional pricing system assures readers of accurate values, whether a vehicle is a #1 low-mileage, rust-free beauty or a #6 parts-only heap. "Techs & specs", original factory prices, production and serial numbers, and engine/chassis codes are noted by model, thus helping you determine authenticity accuracy. Historical, technical and pricing information are combined from hundreds of sources. James Flammang values each model according to the popular 1-6 grading system invented by Old Cars magazine.

Russian Society and the Orthodox Church examines the Russian Orthodox Church's social and political role and its relationship to civil society in post-Communist Russia. It shows how Orthodox prelates, clergy and laity have shaped Russians' attitudes towards religious and ideological pluralism, which in turn have influenced the ways in which Russians understand civil society, including those of its features - pluralism and freedom of conscience - that are essential for a functioning democracy. It shows how the official church, including the Moscow Patriarchate, has impeded the development of civil society, while on the other hand the non-official church, including nonconformist clergy and lay activists, has promoted concepts central to civil society.

After disassembling and gutting your car, it is easy to feel that you're in way over your head when it comes to the upholstery. This is why so many do-it-yourself restorers outsource the work, at considerable expense, to an experienced upholstery shop. Taking the time to acquire the skills for upholstery restoration may feel like a daunting task, but what if an experienced upholsterer presented every skill you needed to restore upholstery yourself? Starting with a list of necessary tools, author Fred Mattson guides you through all the required tasks, including seat restoration; door panel removal, patterning, assembly, and installation; headliner removal and installation; carpet cutting; and even convertible top restoration. The easy-to-follow step-by-step presentation allows for a thorough understanding of all the processes. Every photo in this book provides a hands-on approach that shows you how to repair and restore a car's interior to concours, show-quality specifications. Other restoration books may show you beautifully restored interiors, but they don't show you how to produce them. This book helps you develop the skills needed with instruction from a professional upholsterer, saving you thousands of dollars over outsourcing the restoration. If you are interested in saving money, doing a complete restoration yourself, or simply want to know how it's done, this book is a handy addition to your automotive library.

High-Performance Ignition Systems: Design, Build & Install is a completely updated guide to understanding automotive ignition systems, from old-school points and condensers to modern computer-controlled distributorless systems, and from bone-stock systems to highly modified.

Energy technologies in the future will need to be based on renewable sources of energy and will, ultimately, need to be sustainable. This book provides insight into unintended, negative impacts and how they can be avoided. In order to steer away from the pitfalls and unintended effects, it is essential that the necessary knowledge is available to the developers and decision makers engaged in renewable energy. The value of this book lies in its presentation of the unintended health and environmental impacts from renewable energies. The book presents results from cross-disciplinary research on the implementation of alternative fuels in the transport sector, namely hydrogen, electricity and biodiesel. This is followed by an assessment of environmental impacts from the production of solar cells. Critical reviews on the use of nanotechnology and nanomaterials in the energy technologies is then provided, with the formation of nanoparticles during combustion of bio-blended diesel and their toxic effects, discussed in detail.

The complete history of the groundbreaking sportscar that opened up export markets for the Japanese - particularly in America. Covered are all the FairLady (Datsun 1600/2000 roadster) sportscars, through 240Z, 260Z and 280Z.
