Walleye Pollock is one of the world's largest fisheries. In this volume, the first review describes the population biology of walleye Pollock including its life history, population dynamics, genetic structure, and metapopulation structure. The second review discusses pollutants and the marine environment using ecotoxicological bioassays with bivalve embryos and larvae. These tests ascertain the effects of pure chemicals and determine the quality of effluents, coastal waters, and sediments sampled in the field. Advances in Marine Biology has always offered marine biologists an in-depth and up-to-date review on a variety of topics. As well as many volumes that provide a selection of important topics, the series also includes thematic volumes that examine a particular field in detail.

Regular seafood consumption is associated with beneficial health effects. This book reviews the research on seafood and health, the use and quality aspects of marine lipids and seafood proteins as ingredients in functional foods and consumer acceptance of (marine) functional food. The first chapter covers novel merging areas where seafood may prevent disease and improve health such as in cognitive

development, mental health, cancer, allergy and oxidative stress are highlighted. Cases where nutrients in seafood may have health protective effects such as in proteins, peptides, amino acids, selenium, chitosan, glucosamine and chondroitin sulphate are also discussed. The next chapters cover quality aspects of marine lipids and seafood proteins as ingredients in functional foods. Lipids and proteins must have and retain a high quality so that the sensory and functional properties and the shelf life of the final product are acceptable. The methods used for processing marine lipids and proteins, are discussed as well as the different factors that can affect their quality in functional foods. The book then concentrates on factors related to consumers' attitudes, knowledge and awareness of functional foods. There are variations in types of carrier products and of demographic and cross-cultural factors in acceptance of functional foods. Finally, the book discusses challenges for small and medium enterprises to commercialise healthy nutrition. Variations in characteristics, capabilities, challenges and opportunities in the marketplace are presented using a Nordic study as reference.

Summarizes and integrates more than a decade of atmospheric chemistry research, carried out under the auspices of the International Global Atmospheric Chemistry (IGAC) Project of the International Geosphere-Biosphere Programme (IGBP).

Praise for Guy P. Brasseur's Atmospheric Chemistry in a Changing World American Meteorological Society

"This volume summarizes and integrates more than a decade of atmospheric chemistry research. During the period under consideration, great progress has been made in computing, modeling, and observational techniques, and methods have also improved. Here, suggestions for the highest priority research for the next decade are made, and important information is related regarding impacts on the environment."

Marine Gyro-Compasses and Automatic Pilots: A Handbook for Merchant Navy Officers, Volume One: Gyro Compasses is manual for the various types of compass utilized in naval navigation. The text details the apparent motion of fixed objects, and then proceeds to discussing the principles of free gyroscopes. Next, the selection tackles controlled gyroscopes and gyroscopic compasses. The text also covers errors and corrections, along with the comparison of gyroscopic and magnetic compasses. The subsequent chapters talk about the different types of gyro compasses, such as Sperry Gyro-Compass Mark E. XIV, The Brown Gyro-Compass Types A and B, Arma-Brown Compass, and The Marine Gyrosyn Compass. The book will be of great use to student and professional maritime navigators.
