The thrilling Newbery Medal-winning classic about an Eskimo girl lost on the Alaskan tundra Julie of the Wolves is a staple in the canon of children ' s literature and the first in the Julie trilogy. The survival theme makes it a good pick for fans of wilderness adventures such as My Side of the Mountain, Hatchet, or Island of the Blue Dolphins. This edition, perfect for classroom or home use, includes John Schoenherr ' s original scratchboard illustrations throughout, as well as bonus materials such as an introduction written by Jean Craighead George ' s children, the author ' s Newbery acceptance speech, selections from her field notebooks, a discussion guide, and a further reading guide. To

her small Eskimo village, she is known as Miyax; to her friend in San Francisco, she is Julie. When her life in the village becomes dangerous, Miyax runs away, only to find herself lost in the Alaskan wilderness. Miyax tries to survive by copying the ways of a pack of wolves and soon grows to love her new wolf family. Life in the wilderness is a struggle, but when she finds her way back to civilization, Miyax is torn between her old and new lives. Is she Miyax of the Eskimos—or Julie of the wolves? Don't miss any of the books in Jean Craighead George's groundbreaking series: Julie of the Wolves, Julie, and Julie's Wolf Pack.

The names of the seven Mercury astronauts were announced in April 1959 amid a flurry of publicity and patriotism. This work provides biographical details of all thirty-two finalists for the seven coveted places as America's pioneering astronauts. All of the candidates were among the nation's elite pilots involved in testing new supersonic aircraft capabilities. Most had served as wartime fighter and bomber pilots; some were test pilots on top secret and sophisticated aviation projects, while others were fleet admirals, prisoners of war, and proposed pilots for spaceflight programs such as the Dyna-Soar (X-20). The names of all 32 finalists have been kept secret until very recently. "Selecting the Mercury Seven" also relates the history and difficulties behind the initial choice of candidates. The lives, motivations, military careers, and achievements of the unsuccessful twenty-five finalists are explored first in fully authorized biographies. Test pilots for the U.S. Navy, Air Force, and Marine Corps, each man has a fascinating and very different story to tell. All thirty-two men had to endure meticulous, demeaning, and brutal week-long medical examinations at the Lovelace Clinic in New Mexico. This was followed by another torturous week at the Wright Aeromedical Laboratory in Ohio, where they were subjected to extreme fitness and physiological testing, the sole purpose of which was to sort out the Supermen from the near-supermen. The final part of the book examines the accomplishments and spaceflights of the seven successful candidates, bringing their amazing stories right up to date.

Mercury/Mariner 2.5 - 60 HP Two-Stroke Outboard Service and Repair Manuals, 1998-2006 B725 This manual covers seventeen Mercury/Mariner 2-stroke outboard motors ranging from 2.5 HP to 60 HP. Clymer Marine and PWC manuals are the #1 source for DIY maintenance, troubleshooting and repair. With step-by-step procedures combined with detailed photography and extensive use of exploded parts views, Clymer manuals are a must-have tool for the do-it-yourselfer. Models Covered: Mercury/Mariner 2.5 HP (1998-2006) Mercury/Mariner 3.3 HP (1998-2006) Mercury/Mariner 4 HP (1998-2006) Mercury/Mariner 5 HP (1998-2006) Mercury/Mariner 6 HP (1998-2006) Mercury/Mariner 8 HP (1998-2006) Mercury/Mariner 9.9 HP (1998-2006) Mercury/Mariner 15 HP (1998-2006) Mercury/Mariner 20 HP (1998-2006) Mercury/Mariner 25 HP (1998-2006) Mercury/Mariner 30 HP (1998-2006) Mercury/Mariner 40 HP (1998-2006) Mercury/Mariner 50 HP (1998-2006) Mercury/Mariner 60 HP (1998-2006) Mercury/Mariner 20 Jet (1998-2006) Mercury/Mariner 30 Jet (1998-2006) Mercury/Mariner 45 Jet (1998-2006)

More and more sailors and powerboaters are buying and relying on electronic and electric devices aboard their boats, but few are aware of proper installation procedures or how to safely troubleshoot these devices if they go on the blink.

Orbital Mechanics for Engineering Students, Second Edition, provides an introduction to the basic concepts of space mechanics. These include vector kinematics in three dimensions; Newton's laws of motion and gravitation; relative motion; the vector-based solution of the

classical two-body problem; derivation of Kepler ' s equations; orbits in three dimensions; preliminary orbit determination; and orbital maneuvers. The book also covers relative motion and the two-impulse rendezvous problem; interplanetary mission design using patched conics; rigid-body dynamics used to characterize the attitude of a space vehicle; satellite attitude dynamics; and the characteristics and design of multi-stage launch vehicles. Each chapter begins with an outline of key concepts and concludes with problems that are based on the material covered. This text is written for undergraduates who are studying orbital mechanics for the first time and have completed courses in physics, dynamics, and mathematics, including differential equations and applied linear algebra. Graduate students, researchers, and experienced practitioners will also find useful review materials in the book. NEW: Reorganized and improved discussions of coordinate systems, new discussion on perturbations and quaternions NEW: Increased coverage of attitude dynamics, including new Matlab algorithms and examples in chapter 10 New examples and homework problems

“ An eye-opening and riveting account of how guns make it into the black market and into the hands of criminals and drug lords. ”
–Adam Winkler The gun control debate is revived with every mass shooting. But far more people die from gun deaths on the street corners of inner city America and across the border as Mexico's powerful cartels battle to control the drug trade. Guns and drugs aren't often connected in our heated discussions of gun control-but they should be. In Ioan Grillo's groundbreaking new work of investigative journalism, he shows us this connection by following the market for guns in the Americas and how it has made the continent the most murderous on earth. Grillo travels to gun manufacturers, strolls the aisles of gun shows and gun shops, talks to FBI agents who have infiltrated biker gangs, hangs out on Baltimore street corners, and visits the ATF gun tracing center in West Virginia. Along the way, he details the many ways that legal guns can cross over into the black market and into the hands of criminals, fueling violence here and south of the border. Simple legislative measures would help close these loopholes, but America's powerful gun lobby is uncompromising in its defense of the hallowed Second Amendment. Perhaps, however, if guns were seen not as symbols of freedom, but as key accessories in our epidemics of addiction, the conversation would shift. Blood Gun Money is that conversation shifter.

2.5 HP, 3.3 HP, 4 HP, 5 HP, 6 HP, 8 HP, 9.9 HP, 15 HP, 20 HP, 20 Jet, 25 HP, 30 HP, 30 Jet, 40 HP, 45 Jet, 50 HP, 60 HP

This is the first book to present the science and instruments of NASA ' S MESSENGER space mission. The articles, written by the experts in each area of the MESSENGER mission, describe the mission, spacecraft, scientific objectives, and payload. The book is of interest to all potential users of the data returned by the mission, to those studying the nature of Mercury, and by all those interested in the design and implementation of planetary exploration missions.

Looks at the operations of the International Space Station from the perspective of the Houston flight control team, under the leadership of NASA's flight directors, who authored the book. The book provides insight into the vast amount of time and energy that these teams devote to the development, planning and integration of a mission before it is executed. The passion and attention to detail of the flight control team members, who are always ready to step up when things do not go well, is a hallmark of NASA human spaceflight operations. With tremendous support from the ISS program office and engineering community, the flight control team has made the International Space
